April 15, 2003

To the Citizens of the State of Illinois, Honorable Rod R. Blagojevich, Governor and Honorable Members of the General Assembly:

I am pleased to present to you the State of Comprehensive Annual Financial **Report (CAFR)** for the year ended June 30, 2002. The CAFR is the State's official annual report which provides the readers with the financial position of the State as of June 30, 2002, and results of operations during the fiscal year. The report is intended to provide the State's taxpayers, managers, investors, creditors, lawmakers, and other users with information in accordance with generally accepted accounting principles (GAAP). Responsibility for the accuracy of the data as well as the completeness and fairness of presentation of this report rests with my Office and other State agency management. This report necessarily includes amounts which based certain are management's best estimates and judgments.

The CAFR is presented in the following sections: introductory; financial; and statistical and economic. The *introductory section* includes the table of contents, the Comptroller's letter of transmittal, and the State's organizational chart. The *financial section* includes the Independent Auditors' Report on the basic financial statements, the management's discussion and analysis, the basic financial statements, required supplementary information and the individual fund financial statements and schedules. The *statistical and economic section* includes selected demographic and business data, generally on a multi-year basis.

The Managements Discussion and Analysis (MD&A), which begins on page 3 on this report, provides a narrative introduction, overview and analysis to the accompanying basic financial statements. This letter is intended to complement the MD&A and should be read in conjunction with it. The accompanying basic financial statements are prepared in conformity with GAAP applicable to State governments as prescribed by the Governmental Accounting Standards Board (GASB). This office supports the GASB, contributed to its formation and participates the development pronouncements, providing testimony at public hearings and submitting comments recommendations as proposed standards are distributed for exposure.

The CAFR includes all funds, elected offices, departments and agencies of the State, as well as all boards, commissions, authorities and universities for which the State's executive or legislative branches are financially accountable. The financial statements distinguish between government organizations component units. The primary government is the nucleus of the financial reporting entity and is the focal point for the users of the financial statements. The primary government of the State consists of all the organizations that make up its legal entity. All funds, departments, agencies, offices and other organizations that are not legally separate are, for financial reporting purposes, part of the State or another entity's

primary government. Component units are legally separate organizations for which the State is financially accountable.

The financial activities of the State are organized on the basis of individual funds, each of which is a separate accounting entity segregated for the purpose of carrying out specific activities or attaining certain objectives in accordance with specific regulations, restrictions and limitations. Major funds are the focus of the State's financial statements and include the General Fund, the Road Fund, the Motor Fuel Tax Fund, the State Construction Account, the Unemployment Compensation Trust Fund, the Water Revolving Fund, and the Designated Account Purchase Program Fund. The reporting entity, major funds, and fund types are described in detail in Note 1 to the financial statements. To ensure readability of the financial statements, generally only funds with total assets, liabilities, fund equity, revenues or expenditures greater than 2% of the total for that fund type are presented separately in the individual fund financial statements, except component units where all units are presented, and special revenue funds where anything greater than .5% of the total is presented.

Combination of funds is necessary due to the existence of more than 700 funds in the State's reporting entity. Funds used by more than one agency are classified with what is determined to be the primary administering agency.

An organizational chart, showing the relationships between the Citizens of the State of Illinois, the three branches of Illinois State government and those of the various agencies, boards, commissions and universities which provide a full range of State government services, is presented on page I-16.

MAJOR INITIATIVES

Senior Care Program

During June 2002, the State implemented a Senior Care Program based on a federal Medicaid

waiver. The program expanded drug coverage to approximately 150,000 senior citizens previously covered under the more restrictive Circuit Breaker Program.

Early Retirement Incentive (ERI)

On June 25, 2002, the Governor signed PA 92-566 that amended the Illinois Pension Code and created the ERI. The ERI allowed members of the State Employees' Retirement System (SERS) to purchase up to five years each of service and age enhancement and then leave State employment.

In general terms, the ERI gave members two options. If they met the ERI retirement eligibility requirements, they could retire between August 1, 2002 and January 1, 2003 using the age and service enhancement (Option 1). If they did not meet the ERI retirement eligibility requirements between August 1, 2002 and January 1, 2003, they could purchase ERI service, terminate employment by January 1, 2003 and receive retirement benefits when they become eligible at a future date (Option 2).

When a similar program was instituted in 1991, slightly more than 4,600 employees took advantage of it. The potential fiscal impact of this new ERI is uncertain at this time. However, SERS data shows that 21,367 employees were eligible and that the annual base salaries of those eligible totaled almost \$1.1 billion statewide. Of those eligible, 13,639 or 63.8% were paid from the General Revenue Fund with base salaries of \$670.5 million.

Tax Changes

Because of the rapidly deteriorating fiscal condition during fiscal year 2002, Illinois changed several taxes and reallocated some resources in an effort to provide some fiscal relief to the beleaguered General Revenue Fund.

Effective July 1, 2002, the State increased the cigarette tax by 40 cents per pack of 20 cigarettes. This increase is expected to raise

approximately \$235 million in fiscal year 2003, with the proceeds deposited in the Long-Term Care Provider Fund. This will have a two-fold impact on the General Revenue Fund. During fiscal years 2000 and 2001, \$160 million was transferred from the General Revenue Fund to the Long Term Care Provider Fund to help finance the State's portion of Medicaid payments to long-term care providers. The tax increase eliminated the need for this transfer. In addition, it allowed some Medicaid spending to be moved from the General Revenue Fund to the Long Term Care Provider Fund.

Legislation permanently reallocated 0.4% of sales tax collections (approximately \$27 million) from the Local Government Distributive Fund to the General Revenue Fund. In addition, 25% of the existing real estate transfer tax (approximately \$15 million) was reallocated to the General Revenue Fund.

Riverboat gambling taxes were increased and are expected to generate an additional \$135 million in fiscal year 2003. These new revenues will be transferred into the Education Assistance Fund and used to support spending for elementary and secondary education as well as higher education.

Legislation was also adopted to decouple the State's Income Tax law from the increased federal depreciation allowance provided by the Federal Job Creation and Workers Assistance Act of 2002. Without this action, Illinois corporate income tax liability could have been reduced by an estimated \$240 million.

In the spring of 2001, Congress overhauled the federal estate tax. While phasing out and repealing the tax over a ten year period, it phases out over four years and repeals the State death tax credit which is the basis for the State inheritance tax. Inheritance taxes are estimated to decline by \$39 million in fiscal year 2003.

Short-term Borrowing

In July 2002, the State took several actions to help alleviate the ongoing fiscal crisis. On July 1, 2002, \$226 million was transferred from the

Budget Stabilization Fund to the General Revenue Fund. The same day, \$156 million in "surplus" balances was transferred from 28 other State funds to the General Revenue Fund. In addition, Illinois borrowed \$1 billion in short-term notes with \$700 million deposited in the General Revenue Fund, \$150 million to the Long Term Care Provider Fund, and \$150 million to the Income Tax Refund Fund. Both the \$226 million from the Budget Stabilization Fund and the \$1 billion in short-term borrowing must be repaid by the end of fiscal year 2003.

Receivables Reporting

The Office of the Comptroller continues to establish and enforce measures to help reduce the amount of receivables owed to the State. Effective January 1, 1998, all debts that exceed \$1,000 and are more than 90 days past due are required to be reported in the Comptroller's Offset System. Prior to this date, only debts in excess of \$1,000 and more than 1 year past due were required to be reported. The new legislation enables the Comptroller's Office to intercept tax refunds and other payments that may otherwise be paid to the State's debtors. Due to stricter monitoring of State agency compliance, the Office of the Comptroller has effected the recovery of millions of dollars in fiscal year 2002.

The Public Accountability Report of Service Efforts and Accomplishments (SEA)

One of the priorities of this Comptroller is to improve the accountability of State governmental agencies to the public they serve by reporting on the efficiency, effectiveness, and outcomes of government programs. To this end the Comptroller has launched the **Public** Accountability Project which has instituted a process by which State agencies annually report on their performance in carrying out their statutory missions. The instrument for this process is Service Efforts and Accomplishments (SEA) Reporting as outlined bv Governmental Accounting Standards Board (GASB). The Office of the Comptroller is

working with the GASB to determine and set standards for this type of financial reporting. Illinois has been designated by the GASB as an official "experimentation site" for SEA reporting. The Illinois Public Accountability (SEA) Report is available upon request.

Internal Control

Each State agency's management is responsible for establishing and maintaining internal control designed to ensure that the assets of the State are protected from loss, theft or misuse, and to ensure that adequate accounting data are compiled to allow for the preparation of financial statements in conformity with generally accepted accounting principles. The State's internal controls are designed to provide reasonable, but not absolute, assurance that these objectives are met. The concept of reasonable assurance recognizes that (1) the cost of a control should not exceed the benefits likely to be derived; and (2) the valuation of costs and benefits requires estimates and judgments by management.

On October 31, 1989 the Fiscal Control and Internal Auditing Act (FCIAA) became law, requiring all State agency chief executive officers to annually certify the adequacy of internal controls in place within their agencies. The first annual certifications by State agency CEOs were due November 15, 1990. Subsequent certifications are due May 1st each year. The FCIAA also requires that certain agencies have a chief internal auditor with a specified minimum level of professional competency.

Budgetary Controls

The Comptroller's Statewide Accounting Management System (SAMS) provides the basis for receipt, expenditure and encumbrance reporting of all State treasury held funds with specific budgetary controls maintained on lineitem expenditures for all appropriated funds. Appropriations (budget) and actual expenditure analysis for significant individual funds is

provided in the Budgetary Schedules section of this report.

The State of Illinois has a two-month "lapse period." During this time, July 1 to August 31, State agencies can expend funds appropriated in the prior fiscal year if encumbered by June 30. For all fund types, goods or services received prior to June 30 are recorded as liabilities and expenses, expenditures or whichever appropriate. For governmental fund types, lapse period expenditures for goods or services encumbered as of June 30 and received prior to August 31 are reported with other encumbrances as reservations of June 30 fund balances and not as liabilities or expenditures.

Investment Management

The Illinois State Treasurer is responsible for investing all cash resources of the State, with the exception of those held by the retirement systems and certain debt service, enterprise, agency, universities' endowments and other locally-held funds. Of the five retirement systems, three pool their resources for investment and two invest their resources under investment master trustee arrangements with individual investment managers. The universities are granted independent powers to invest their funds which are held outside the State Treasury. income earned on the cash resources received and invested by the State Treasurer is allocated to the various funds (where specified by law) based on the average daily cash balances invested.

Cash Management

The State of Illinois' daily activities are operated on a "cash basis," where bills are paid with the available balances of cash on hand. As chief fiscal officer of the State of Illinois, the Comptroller maintains the State's central fiscal accounts and is responsible for ordering all payments into and out of the funds held by the State Treasurer. The State's end-of-year cash balance dropped during fiscal year 2002 for the

second consecutive year. The General Fund's available balance at June 30, 2002 was \$256 million, \$870 million lower than the balance at June 30, 2001. The State's "cash basis" activity during fiscal year 2002 is discussed in more detail in the MD&A.

The General Fund includes the three school and General Revenue Fund accounts which administer about 40% of the State's annual expenditures. The General Revenue Account is also the State's basic operating fund, funding at least a portion of the operating budget of every major agency. Because of the sheer size of the General Revenue Fund, annual changes in the General Fund end-of-year available cash balance are usually governed by changes in the General Revenue Fund. For fiscal year 2002, \$683 million or 79% of the deterioration in the cash balance occurred in the General Revenue Fund.

General Fund

Many State programs are accounted for in the General Fund. As analyzed in the MD&A, the State's GAAP basis financial position at June 30, 2002 worsened from fiscal year 2001. The *fund* deficit in the State's General Fund fell by \$1.941 billion on a GAAP basis (from a deficit \$1.365 billion, as restated, to a deficit \$3.306 billion). On the *budgetary basis*, there was a \$1.220 billion fund deficit at June 30, 2002 compared to a \$300 million balance at June 30, 2001, a \$1.520 billion decrease.

In addition, the *unreserved* fund deficit on a GAAP basis decreased by \$1.913 billion from a deficit of \$1.545 billion, as restated, to a deficit of \$3.458 billion. Expenditures and transfers-out exceeded revenues and transfers-in to the General Fund by \$1.941 billion in fiscal year 2002.

Unfortunately, there is no indication that an economic turnaround is imminent. In fact, available data continue to point towards a continued slide in revenues. At this time, there appears to be a strong likelihood that fiscal year 2003 revenues will actually drop for the second consecutive year. Even if spending slows markedly, the continuing weakness in revenues

and the need to set aside money for short-term borrowing repayments make it likely that cash flow difficulties will continue to worsen for the rest of the year.

Risk Management

The State's risk management encompasses a wide range of State government activities. Generally, the State has elected to retain most exposures to risk, with only limited purchase of commercial insurance. Among the exceptions are coverage for real property at the James R. Thompson Center in Chicago, the State Retirement Systems building, and the Regional State Office complex in Collinsville. Limited commercial coverage for personal property includes a small portion of the State's fleet of motor vehicles, certain telecommunications equipment, the fixed and rotary wing aircraft fleet, some State watercraft, selected items of electronic data processing equipment, a portion of the State's collection of fine art, as well as a small number of other property and liability exposures.

The State retains workers' compensation and auto liability exposures, including claims management. Other major retained risks include employee fidelity and surety, as well as general liability. The State's risk management program also includes legal representation and indemnification of employees sued for violation of civil and constitutional rights and other tort liabilities while acting in an official capacity.

Independent Audit

The Illinois Auditor General has performed an audit of the accompanying basic financial statements in accordance with generally accepted auditing standards and *Government Auditing Standards* issued by the Comptroller General of the United States. His unqualified opinion appears at the beginning of the financial section of this report. In addition, the Illinois Auditor General is conducting an Audit pursuant to the requirements set forth in the Federal Single Audit Act Amendments of 1996 and the related U.S. Office of Management Budget Circular A-133,

Certificate of Achievement

The Government Finance Officers Association of the United States and Canada ("GFOA") awarded a Certificate of Achievement for Excellence in Financial Reporting ("Certificate") to the State of comprehensive annual Illinois for financial report ("CAFR") for the fiscal year ended June 30, 2001. This is the eighteenth consecutive year that the State has received this prestigious award in governmental financial reporting. In order to be awarded a Certificate, the State of Illinois published an easily readable and efficiently organized comprehensive annual financial report. This report must satisfy both generally accepted accounting principles and applicable legal requirements.

A Certificate is valid for a period of one year only. As this current comprehensive annual financial report is expected to meet the Certificate of Achievement Program's requirements, it is being submitted to the GFOA to determine its eligibility for another certificate.

Acknowledgments

The preparation of the State's Comprehensive Annual Financial Report was made possible by the due diligence of my staff, the Auditor General's Office and all State agencies who submitted timely information during this year's GAAP financial statement process. Their hard work and dedication has resulted in an excellent financial report of which we can be proud. I express my gratitude to all of those involved for this tremendous cooperative effort.

Sincerely,

Daniel W. Hynes Comptroller

Certificate of Achievement for Excellence in Financial Reporting

Presented to

State of Illinois

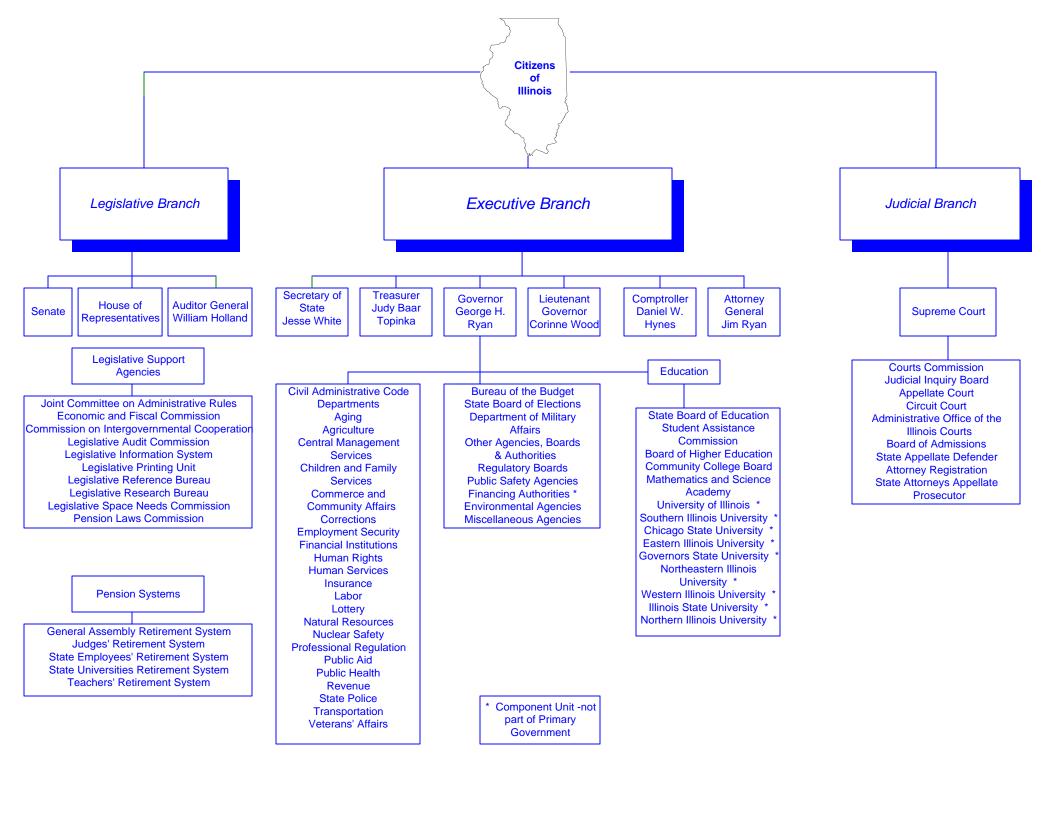

For its Comprehensive Annual Financial Report for the Fiscal Year Ended June 30, 2001

A Certificate of Achievement for Excellence in Financial Reporting is presented by the Government Finance Officers
Association of the United States and Canada to government units and public employee retirement systems whose comprehensive annual financial reports (CAFRs) achieve the highest standards in government accounting and financial reporting.

President

Executive Director

STATE OF ILLINOIS WILLIAM G. HOLLAND AUDITOR GENERAL Independent Auditors' Report

Honorable Emil Jones, Jr., President of the Senate Honorable Michael J. Madigan, Speaker of the House Members of the General Assembly Honorable Rod Blagojevich, Governor Honorable Daniel W. Hynes, Comptroller

We have audited the accompanying financial statements of the governmental activities, the business-type activities, the aggregate discretely presented component units, each major fund, and the aggregate remaining fund information of the State of Illinois, as of and for the year ended June 30, 2002, which collectively comprise the State of Illinois' basic financial statements as listed in the foregoing table of contents. These financial statements are the responsibility of the State's management. Our responsibility is to express opinions on these financial statements based on our audit.

We conducted our audit in accordance with auditing standards generally accepted in the United States of America and the standards applicable to financial audits contained in Government Auditing Standards, issued by the Comptroller General of the United States. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audit provides a reasonable basis for our opinions.

In our opinion, the financial statements referred to above present fairly, in all material respects, the respective financial position of the governmental activities, the business-type activities, the aggregate discretely presented component units, each major fund, and the aggregate remaining fund information of the State of Illinois, as of June 30, 2002, and the respective changes in financial position and cash flows, where applicable, thereof for the year then ended in conformity with accounting principles generally accepted in the United States of America.

As discussed in Note 1 to the financial statements, the State of Illinois adopted the provisions of Governmental Accounting Standards Board (GASB) Statement No. 34, Basic Financial Statements – and Management's Discussion and Analysis – for State and Local Governments; GASB Statement No. 35, Basic Financial Statements – and Management's

Discussion and Analysis - for Public College and Universities, GASB Statement No. 37, Basic Financial Statements - Management's Discussion and Analysis - for State and Local Governments: Omnibus; GASB Statement No. 38, Certain Financial Statement Note Disclosures; and GASB Interpretation No. 6, Recognition and Measurement of Certain Liabilities and Expenditures in Governmental Fund Financial Statements, effective July 1, 2001. This resulted in changes to the format and content of the financial statements.

The management's discussion and analysis, budgetary comparison schedule and related notes - major governmental funds, and the pension trust funds - schedule of funding progress are not required parts of the basic financial statements but are supplementary information required by the Governmental Accounting Standards Board. We have applied certain limited procedures. which consisted principally of inquiries of management regarding the methods of measurement and presentation of the supplementary information. However, we did not audit the information and express no opinion on it.

Our audit was conducted for the purpose of forming opinions on the financial statements that collectively comprise the State of Illinois' basic financial statements. The introductory section, combining and individual fund financial statements and schedules, and statistical and economic section are presented for purposes of additional analysis and are not a required part of the basic financial statements. The combining and individual fund financial statements and schedules have been subjected to the auditing procedures applied in the audit of the basic financial statements and, in our opinion, are fairly stated in all material respects in relation to the basic financial statements taken as a whole.

The introductory section and statistical and economic section have not been subjected to the auditing procedures applied in the audit of the basic financial statements and, accordingly, we do not express an opinion on them.

In accordance with Government Auditing Standards, a report on our consideration of the State of Illinois' internal control over financial reporting and our tests of its compliance with certain provisions of laws, regulations, contracts, and grants will be issued under a separate cover. That report, upon its issuance, is an integral part of an audit performed in accordance with Government Auditing Standards and should be read in conjunction with this report in considering the results of our audit.

Springfield, Illinois April 15, 2003

MANAGEMENT'S DISCUSSION AND ANALYSIS

The following is a discussion and analysis of the State of Illinois' (the State's) financial performance, providing an overview of the activities for the fiscal year ended June 30, 2002. Please read it in conjunction with the transmittal letter and with the State's financial statements, which follow this section. Because fiscal year 2002 represents the first year in which the State implemented the provisions of Governmental Accounting Standards Board (GASB) Statement No. 34, this discussion and analysis provides few comparisons of financial information with the previous year. The discussion and analysis in future reports will include such comparisons.

OVERVIEW OF THE FINANCIAL STATEMENTS

This discussion and analysis is an introduction to the State's basic financial statements, which comprise three components: 1) government-wide financial statements, 2) fund financial statements, and 3) notes to the financial statements. In addition, this discussion and analysis also contains information on other supplementary information included in this report.

For the first time, this report includes government-wide financial statements as required by GASB Statement No. 34.

Government-wide Statements (Reporting the State as a Whole)

The Statement of Net Assets and the Statement of Activities are two financial statements that report information about the State, as a whole, and about its activities. These statements include all non-fiduciary assets, liabilities, revenues and expenses using the accrual basis of accounting.

The Statement of Net Assets (page 21) presents all of the State's non-fiduciary assets and liabilities, with the difference between the two reported as "net assets". Over time, increases and decreases in net assets measure whether the State's financial position is improving or deteriorating.

The Statement of Activities (pages 22 and 23) presents all of the State's non-fiduciary revenues and expenditures, with the difference showing how the State's net assets changed during the current fiscal year. All changes in net assets are reported as soon as the underlying events giving rise to the change occur, regardless of the timing of related cash flows. Therefore, revenues and expenses are reported in these statements for some items that will only result in cash flows in future fiscal periods (e.g. uncollected taxes and unused accrued absences).

Both statements report three activities:

- Governmental Activities Most of the State's basic services are reported under this category. Taxes and intergovernmental revenues generally fund these services. The Legislature, the Judiciary, Elected Officials and the general operations of the Executive departments fall within the governmental activities.
- Business-type Activities The State charges fees to customers to help it cover all or most of the cost of certain services provided by the State. Lottery tickets and the State's unemployment compensation services are examples of business-type activities.
- Discretely Presented Component Units Component units are legally separate organizations for which the elected officials of the primary government are financially accountable. The State has 12 authorities, 9 universities and 10 other organizations that are reported as discretely presented component units of the State.

Included within the basic financial statements are two schedules (pages 25 and 27) that reconcile the amounts reported on the governmental fund financial statements (modified accrual accounting) with governmental activities on the appropriate government-wide statements (accrual accounting). Modified accrual accounting focuses on the current financial resources which are the resources available for spending in the near future (defined by the State as 60 days). Accrual accounting reports the total economic resources similar to a private-sector business. The following summarizes the impact of transitioning from modified accrual to accrual accounting:

- Capital assets used in governmental activities are not financial resources and therefore are not reported in governmental funds statements.
- Prepaid expenses for governmental activities are current uses of financial resources of funds and therefore are not reported in the governmental funds statements.
- Deferred issuance costs are capitalized and amortized as governmental activities, but reported as expenditures in the governmental funds statements.
- Certain revenues that are earned, but not available, are reported as revenues of governmental activities, but are reported as deferred revenue on the governmental funds statements.
- Unless due and payable, long-term liabilities, such as capital lease obligations, compensated
 absences, certificates of participation, net pension obligation, bonds and notes payable appear as
 liabilities in the government-wide statements but are not reported in the governmental funds
 statements.
- Internal service funds are reported as governmental activities, but reported as proprietary funds in the fund financial statements.
- Capital outlay spending results in recording capital assets on the government-wide statements, but is reported as expenditures on the governmental fund statements.
- Bond and note proceeds result in liabilities on the governmental-wide statements, but are recorded as other financing sources on the governmental fund statements.
- Certain other outflows represent either increases or decreases in liabilities on the government-wide statements, but are reported as expenditures on the governmental funds statements.

The Notes to the Basic Financial Statements provide additional information that is integral to understanding the data provided in the government-wide and fund financial statements. The notes can be found beginning on page 38 of this report.

Fund Financial Statements (Reporting the State's Major Funds)

The fund financial statements begin on page 24 and provide more detail than the government-wide financial statements concentrating on information about the major individual funds. A fund is a fiscal and accounting entity with a self-balancing set of accounts that the State uses to keep track of specific sources of funding and spending for a particular purpose. In addition to the major funds, individual fund data for the non-major funds is presented beginning on page 105. The State's funds are divided into three categories – governmental, proprietary, and fiduciary – with each using a different accounting method.

Governmental funds – Most of the State's basic services are reported in the governmental funds, which focus on how monies flow into and out of those funds and the balances left at year-end that are available for future spending. The governmental fund financial statements provide a detailed short-term view of the State's general government operations and the basic services it provides. Governmental fund information helps determine whether there are more or fewer financial resources that can be spent in the near future to finance the State's programs. Governmental funds are reported using modified accrual accounting, which measures assets of cash and all other financial

assets that can readily be converted to cash and liabilities that are due in the current period. Governmental funds include the General Fund and special revenue, capital project, debt service and permanent funds.

- Proprietary funds When the State charges customers for the services it provides, whether to outside customers or to other agencies within the State, these services are generally reported in proprietary funds. Proprietary funds (enterprise and internal service) utilize accrual accounting; the same method used by private sector businesses. Enterprise funds report activities that provide supplies and services to the general public. An example is the State Lottery Fund. Internal service funds report activities that provide supplies and services for the State's other programs and activities such as the State's Communications Revolving Fund. Internal service funds are reported as governmental activities on the government-wide statements.
- Fiduciary funds The State acts as a trustee or fiduciary, for its employee pension plans. The State is also responsible for other assets that, because of a trust arrangement, can be used only for the trust beneficiaries. The State's fiduciary activities are reported in separate Statements of Fiduciary Net Assets and Changes in Fiduciary Net Assets beginning on page 31. These funds, which include pension (and other employee benefit), private-purpose trust, investment trust and agency funds, are reported using accrual accounting. The government-wide statements exclude fiduciary fund activities and balances because these assets are restricted in purpose and do not represent discretionary assets of the State to finance its operations.

Additional Required Supplementary Information

Following the basic financial statements is additional Required Supplementary Information that further explains and supports the information in the financial statements. The Required Supplementary Information includes budgetary comparison schedules reconciling the statutory and generally accepted accounting principles (GAAP) fund balances at fiscal year-end, and funding progress of the State's retirement systems.

Other Supplementary Information

Other supplementary information includes two components: 1) combining financial schedules for non-major governmental, proprietary and fiduciary funds and non-major discretely presented component units and 2) combining budgetary schedules of non-major funds. The schedules present by fund category, and then by fund type, the amounts presented in the non-major funds column in the fund financial statements.

FINANCIAL ANALYSIS OF THE STATE

The State's combined net assets decreased \$4.828 billion during the current fiscal year. The net assets of the State's governmental activities decreased \$4.204 billion or 83.2% and the net assets of the State's business-type activities decreased \$624 million or 16.9%. The following condensed financial information was derived from the government-wide Statement of Net Assets and reflects the State's financial position as of June 30, 2002:

Net Assets as of June 30, 2002 (in millions of dollars)									
		ernmental		ness-type tivities		Total			
Assets:									
Current and other non-current assets	\$	8,551	\$	6,363	\$	14,914			
Capital assets		15,943		4		15,947			
Total assets		24,494		6,367		30,861			
Liabilities:									
Other liabilities		7,702		230		7,932			
Long-term liabilities		26,049		3,064		29,113			
Total liabilities		33,751		3,294		37,045			
Net assets:									
Invested in capital assets, net of related debt		11,138		4		11,142			
Restricted		1,597		2,891		4,488			
Unrestricted		(21,992)		178		(21,814)			
Total net assets	\$	(9,257)	\$	3,073	\$	(6,184)			

The State's largest asset is its capital assets (land, buildings, equipment, infrastructure, and others). The largest liability is its long-term liabilities including net pension obligation and bonds payable obligation. The largest component of the State's net assets reflects the State's investment in capital assets, less any related debt that was recorded to acquire or construct the assets. Restricted net assets consists of resources subject to external restrictions or enabling legislation on how they can be used. The remaining portion, unrestricted net assets, may be used at the State's discretion.

The following condensed financial information was derived from the government-wide Statement of Activities and reflects the State's decrease in net assets during the current fiscal year:

Governmental Activities:

Governmental activities of the State are financed primarily through taxes collected. The functions reported for governmental activities consist of the following:

- *Health and social services* The health and social services function consists of programs such as Medicaid, Temporary Assistance for Needy Families (TANF) and Child Support Enforcement which are administered mostly by the Department of Public Aid, the Department of Human Services and the Department of Children and Family Services.
- Education The education function *consists* of support for local public school districts and post-secondary institutions administered mostly by the State Board of Education, the State Board of Higher Education and the Illinois Community College Board.
- General government The general government consists of the day-to-day operations of the State performed mostly by the *Elected* Officials, Members of the General Assembly, the Department of Central Management Services and the Department of Revenue.
- Employment and economic development The employment and economic development function consists of job training for citizens and support for the growth of public sector commerce administered mostly by the Department of Commerce and Community Affairs.
- *Transportation* The transportation function consists of support for building and maintaining infrastructure capital assets *owned* by the State and owned by local governments of the State which is administered mostly by the Department of Transportation.
- Public protection and justice The public protection and justice function consists of law enforcement functions of the State and other public safety regulatory programs performed mostly by the Department of Corrections and the Department of State Police.
- Environment and business regulation The environment and business regulation function consists of regulation of the environment of the State and regulation of various business types in the State performed mostly by the Environmental Protection Agency, the Department of Commerce and Community Affairs, the Department of Natural Resources, the Department of Financial Institutions, the Department of Insurance and the Department of Labor.

The following charts display revenues and expenses of the State for governmental activities during the fiscal year:

Business-type Activities:

Net assets of business-type activities decreased \$624 million during the fiscal year. The main factor contributing to this decrease was the \$1.2 billion increase in claims for unemployment in fiscal year 2002.

This increase in claims expense was offset in part, by federal contributions to the Unemployment Compensation Trust Fund.

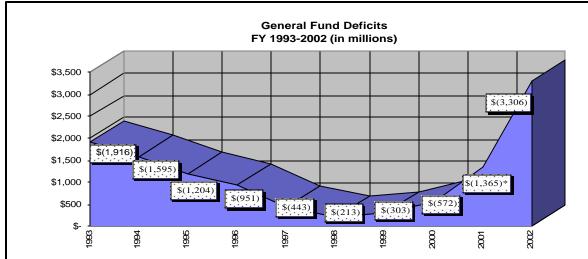

FINANCIAL ANALYSIS OF THE STATE'S MAJOR GOVERNMENTAL FUNDS

General Fund

The General Fund accounts for resources obtained and used for those services traditionally provided by the State which are not required to be accounted for in another fund. Accordingly, the majority of the State's tax revenues and program support expenses are accounted for in the General Fund. For financial reporting purposes, the General Fund consists of several funds of the State which are described on page 105. For budgetary purposes, the General Funds consist of the General Revenue Fund, Special Account Fund, Education Assistance Fund and Common School Fund Accounts.

During fiscal year 2002, the State's budgetary (cash basis) financial position deteriorated for the second consecutive year. When the books were closed on the year, the General Funds budgetary fund balance stood at a record *deficit* of \$1.220 billion compared to a \$300 million *surplus* recorded in fiscal year 2001. The \$1.520 billion drop in the budgetary fund balance is the biggest single-year swing on record and more than three times larger than last year's \$477 million decline.

At the same time, the State's General Fund GAAP balance fell for the fourth consecutive year, dropping from a *deficit* of \$1.365 billion, as restated, in fiscal year 2001, to a record *deficit* of \$3.306 billion. This \$1.941 billion drop is more than two times higher than last year's \$793 million deterioration, as shown below:

* Fiscal year 2001 was restated for a \$130 million overstatement of income tax revenue and \$43 million reduction of expenditures due to the implementation of GASB Interpretation No. 6. Comparative information for the effect of the implementation of GASB Interpretation No. 6 is not available for previous fiscal years. In addition, for years prior to fiscal year 2000, comparative information for revenues, which were restated due to the implementation of GASB Statement No. 33 in fiscal year 2001, and the corresponding effect on the General Fund deficit, is not available. The fiscal year 2000 General Fund deficit was restated by \$257 million due to the implementation of GASB Statement No. 33.

Under both the budgetary and GAAP measures, expenditures exceeded revenues. On a budgetary basis, General Funds spending from fiscal year 2002 appropriations of \$24.899 billion exceeded revenues of \$23.379 billion. On a GAAP basis, expenditures and other uses of financial resources of \$26.742 billion exceeded revenues and other sources of financial resources of \$24.801 billion.

One of the major factors that impact the State's financial well-being is the economy. For most of the period since fiscal year 1992, the economy's performance has been nothing short of remarkable. Since 1997, the surging economy has produced numerous fiscal high points, including record annual revenue growth, record end-of-month balances, and record end-of-year balances. This string of fiscal milestones came to an end in fiscal year 2001, however, as economic activity slowed and cash-flow problems emerged for the first time since the end of fiscal year 1997. Those problems intensified significantly in fiscal year 2002 and continue into fiscal year 2003.

During fiscal year 2002, the State's General Funds turned in its worst performance on record, surpassing the previous lows set during the financial difficulties that spanned fiscal years 1991-1997. Available data indicate that a recession was already well underway in Illinois as the state began fiscal year 2002. It also appears that the tragic events of September 11, 2001 exacerbated an already troublesome economic and fiscal situation.

Over the first quarter of the fiscal year, General Funds total revenues were \$296 million below the prior year with wide-spread weakness in most revenue sources. Although revenue fell dramatically, spending demands continued to grow. As a result, cash flow difficulties emerged in late August. This marked the first time since 1995 that payment delays surfaced so early in the year.

As fiscal year 2002 progressed, the General Funds budgetary financial condition worsened considerably as revenues declined in nine out of the twelve months and in each of the last six months of the year. For the year, "base" revenues (total revenues minus rainy day dollars) were \$727 million or 3.0% below fiscal year 2001 and over \$1.6 billion below the original estimates for fiscal year 2002. The year-over-year revenue decline was led by sources tied directly to economic activity. Hammered by falling employment (nonagricultural employment down 82,000 jobs), declining wage and salary income (down 0.1%), and a free-falling stock market, personal income tax receipts dropped \$525 million. At the same time, the weakening economy and falling profits reduced corporate income tax revenues by \$233 million.

Efforts to reduce spending appear to have had little effect and payment delays plagued the General Funds for nearly the entire fiscal year. Unpaid bills reached as high as \$1.4 billion in mid-April and delays reached as much as 35 days in mid-June. At the end of June, the General Funds cash balance was \$256 million, or \$870 million less than what was in the bank at the end of fiscal year 2001. The dramatic drop in the cash balance was concentrated in the General Revenue Fund Account (GRF) where the cash balance dropped from \$683 million to \$0 over the year, accounting for nearly 79% of the drop in the General Funds balance. In addition to the lack of a balance on June 30, 2002, there were \$781 million in bills on hand that could not be paid. The resulting effective GRF balance (available cash less unpaid bills) was almost \$1.5 billion below last year's ending balance.

Since \$781 million was carried over to July, fiscal year 2002 lapse period spending jumped to \$1.476 billion, the highest ever. The budgetary balance also reached a record deficit of \$1.220 billion. At the same time, the GAAP deficit soared to \$3.306 billion.

At the beginning of fiscal year 2003 the State entered into a \$700 million short-term loan to increase the GRF, transferred \$156 million in surplus money from other funds, and transferred \$226 million from the

Budget Stabilization Fund. These revenues were used to pay bills carried over from June and to relieve a backlog of Medicaid bills. After less than a week, GRF payment delays began to accumulate again. In addition to GRF, \$150 million was borrowed for the Long-Term Care Provider Fund Account and \$150 million was borrowed for the Income Tax Refund Fund for a total short-term loan of \$1 billion.

Unfortunately, the economy has continued to falter, and at the end of the first half of fiscal year 2003, the State's GRF was still experiencing severe cash flow difficulties with more than \$1.4 billion in unpaid bills. Without the one-time infusion of more than \$1 billion in July, the GRF backlog would have been almost \$2.5 billion.

The fiscal year 2003 budget was predicated on "base" revenue growth of \$1.006 billion or 4.3%. However, growth through the first half of the year amounts to only 1.6% and includes weakness in the major sources tied most directly to the economy (personal income tax down 0.6%, corporate income tax down 16.1%, and sales taxes up 0.1%).

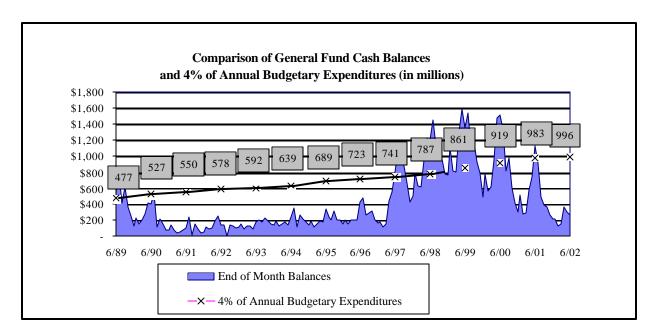

The State's cash flow over the rest of fiscal year 2003 will depend heavily on the performance of the economy and revenue sources tied most directly to economic activity. There does not appear to be any reason to believe that recovery will start soon enough to generate the magnitude of economic activity necessary to reach the current revenue estimates. Given the fact the employment levels continued to decline through December 2002 (manufacturing down more than 40,000 jobs and total nonagricultural employment down more than 55,000), there appears to be more reason to think that fiscal year 2003 revenues might fall below last year, marking the second consecutive annual decline. Even if employment picks up, it seems clear that personal income tax withholding and sales taxes cannot rebound enough to keep payment delays from growing worse, especially given the short-term borrowing and Budget Stabilization Fund repayment requirements.

The factors that determine the GAAP balance include accrued liabilities payable from future year's appropriations. One of the largest components of those liabilities is Section 25 deferrals. After falling substantially from 1995 through 1997, Section 25 deferred liabilities increased in each of the last five years reaching \$752 million in 1998, \$894 million in 1999, \$1.075 billion in 2000, \$1.118 billion in 2001, and \$1.436 billion in 2002 - the third consecutive year that these deferrals have exceeded \$1.0 billion. The \$318 million growth in 2002 included a \$260 million increase under the State's Medicaid program and a \$58 million increase under the group health insurance program for employees, retirees, and their dependents administered by the Department of Central Management Services.

Historically there appears to be a pronounced relationship between the State's financial position and Section 25 deferred liabilities. In fiscal years 1999 and 2000 the deterioration in the GAAP balance was not as large as was indicated by the growth of those liabilities. This was due to the economy's ability to exert enough positive influence to counteract the negative impact of the deferrals.

However, in fiscal year 2002, the recessionary economy caused the GAAP balance to decrease significantly more than the \$318 million increase in the Section 25 deferred liabilities. On the GAAP basis, income tax collections decreased by \$970 million, interest and investment income decreased by \$158 million, and other revenue types combined decreased by \$396 million from a fiscal year which had a General Fund loss of \$793 million. This decrease in revenues was the major contributor to the change in asset and liability balances as non-Section 25 expenditures and transfers-out decreased by \$296 million compared to fiscal year 2001. Asset balances of cash decreasing by \$465 million, investments decreasing \$230 million, and due from other funds decreasing \$205 million coupled with held vouchers (shown as accounts payable) increasing by \$770 million in the General Fund as compared to fiscal year 2001 resulted from the decrease in revenues.

In evaluating the fiscal health of governments, it is generally held that the ability to maintain working balances in the range of 4%-5% of annual budgetary expenditures indicates a strong fiscal position. As evident in the chart below, the State's General Funds budgetary cash balance at the end of June 2002 (\$256 million) was, in fact, far below the 4% threshold. The chart also shows the rapid deterioration in end-of-month balances over the last two years when measured against the recommended threshold.

Road Fund

The Road Fund incurred a \$68 million loss in the current year and has a \$831 million fund balance. The current year loss was caused mainly by the receipt of less federal reimbursements than expected. As in the General Fund, the Road Fund has an unreserved fund balance deficit of \$327 million.

Motor Fuel Tax Fund

The Motor Fuel Tax Fund ended fiscal year 2002 with a \$110 million dollar fund balance (all unreserved) after incurring a \$5 million dollar loss, which was slightly less than the budgeted \$12 million dollar loss.

State Construction Account

The State Construction Account's fund balance decreased \$144 million in fiscal year to an ending fund balance of \$235 million. This loss was \$28 million more than the \$116 million budgeted loss and can be attributed to a decrease in amounts receivable from other funds for fee allocations at the end of the fiscal year. The unreserved portion of the State Construction Account's fund balance is a deficit of \$257 million.

CAPITAL ASSETS AND DEBT ADMINISTRATION

Capital Assets:

At June 30, 2002, the State had \$15.947 billion in capital assets net of accumulated depreciation in the following categories:

Capital Assets as of June 30, 2002 (net of depreciation, in millions of dollars)										
		ernmental ctivities	Busine Act	Total						
Land and land improvements	\$	2,189			\$ 2,189					
Site improvements		306			306					
Buildings and building improvements		2,021	\$	1	2,022					
Equipment		314		3	317					
Infrastructure		10,806			10,806					
Other		40			40					
Subtotal		15,676		4	15,680					
Construction in progress		267			267					
Total	\$	15,943	\$	4	\$15,947					

Under the new reporting model used with the implementation of GASB Statement No. 34, infrastructure capital assets are included in the State's basic financial statements for the first time. These infrastructure assets consist of 68% of the State's net capital assets and compromise \$1.245 billion of the \$1.795 billion (68%) of the current year additions to capital assets. The State capitalizes and depreciates its roads and road improvements over a twenty year period and its bridges over a forty year period. More detailed information regarding the State's capital assets is represented in Note 7 of the financial statements on page 65.

Debt Administration:

Bonded Indebtedness

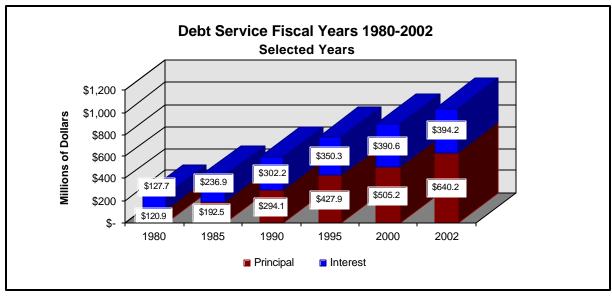

The State, certain State agencies and component units of the State are empowered by law to authorize, issue and sell debt obligations. General obligation bonds, issued by the State, are backed by the full faith and credit of the State and are considered a direct debt of the State. Special obligation bonds are also considered direct debt of the State but are not backed by the full faith and credit of the State. Rather, special obligation bonds are supported and repaid only by a dedicated State revenue source. Revenue bonds are not backed by the full faith and credit of the State but are backed by a specific revenue stream. Some revenue bonds can be considered moral obligation debt which means that if resources from the specified revenue stream are insufficient to support the debt service, the State is then obligated. Also, some revenue bonds are classified as indirect debt which means that the asset is the property of a local government but part of the payment of the debt service comes from State resources. Lastly, some revenue bonds can be considered conduit debt which implies no obligation for the State. More detailed information regarding the State's long-term debt obligations is presented in Notes 9, 10 and 11 of the financial statements beginning on page 69.

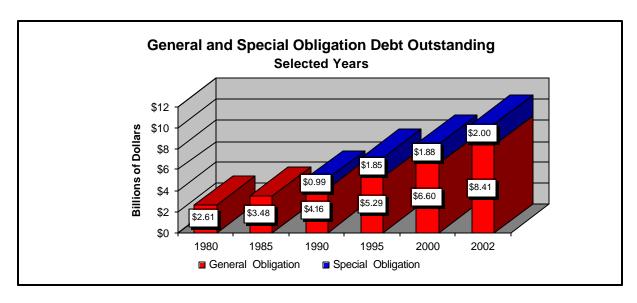

During the fiscal year ending June 30, 2002, the State issued general obligation bonds totaling \$1.9 billion including \$398.5 million to pay off amounts outstanding on previously issued bonds that carried higher interest costs. In addition, the State issued special obligation bonds totaling \$405.6 million including \$255.6 million to pay off amounts outstanding on previously issued bonds that carried higher interest costs. Lastly, the State issued revenue bonds totaling \$1.4 billion including \$166.1 million to pay off amounts outstanding on previously issued bonds that carried higher interest costs.

Outstanding Bonded Debt as of June 30, 2002 (in millions of dollars)								
Primary Government		vernmental activities		ness-type tivities	Total			
General obligation bonds (backed by the State)	\$	8,405			\$	8,405		
Special obligation bonds (backed by specific fee revenue) Revenue bonds (backed by specific tax and fee revenue)		2,003	\$	2,651		2,003 2,651		
Total	\$	10,408	\$	2,651	\$	13,059		

Among the states, Illinois is a moderate debt state with outstanding general and special obligation bonds at June 30, 2002 totaling \$10.408 billion. Bonds have been issued primarily to provide funds for acquisition and construction of capital facilities for higher education, public and mental health, correction and conservation purposes, and for maintenance and construction of highway and waterway facilities. Bonds also have been issued to provide assistance to municipalities for construction of sewage treatment facilities, port districts, aquarium facilities, local schools, mass transportation and aviation purposes, and to fund research and development of coal and alternative energy sources.

General and special obligation bonds, excluding refunding bonds, aggregating \$1,500.0 million and \$150.0 million, respectively, were issued during fiscal year 2002 at average interest rates ranging from 3.0% to 6.0%. Debt service principal and interest costs of \$640.2 million and \$394.2 million, respectively were paid in fiscal year 2002. The dramatic increase since fiscalyear 1980 is displayed in the following chart:

In addition to general and special obligation bonds, the primary government has \$2.650 billion of revenue bonds, \$100.3 million of notes payable and \$1.323 billion of other long-term obligations outstanding as of June 30, 2002.

The State's bond ratings are as follows:

General Obligation Bonds		Special Obligation Bonds-Buil	ld Illinois Bonds
Moody's Investors Service	Aa2	Moody's Investors Service	Aa2

Retirement Systems

Total net assets of the State's five pension trust funds, on a "fair value" basis, aggregated \$40.4 billion at June 30, 2002, a decrease of \$2.5 billion (6%) from the previous year. The State reports assets in the pension trust funds in accordance with GASB Statement No. 27, Accounting for Pensions by State and Local Governmental Employers. The statement requires, among other things, that assets be valued at fair market value.

The majority of the \$2.5 billion decrease in net assets can be explained by investments (at fair value) decreasing by \$3.4 billion due to net losses recorded during the year.

GASB Statement 27 focuses the reader of the State's CAFR on annual pension cost ("APC") in accordance with certain accounting parameters as compared to the amount contributed. The State retirement systems were underfunded by \$912.3 million during fiscal year 2002 and this amount has been added to the Net Pension Obligation (NPO) in the Statement of Net Activities as increased governmental activity expenses (See chart below). Of the \$912.3 million, \$612.3 million occurred at TRS where the APC was calculated to be \$1.5 billion and employer contributions were \$861.9 million.

During fiscal year 2002, all of the State systems were funded in accordance with the *statutory funding* requirement. The new law enacted in fiscal year 1996 provides for a 50-year funding plan with a 15 year phase-in and a "continuing appropriation." The continuing appropriation provides the Comptroller's Office with the authority to automatically provide funding to the pension systems based on actuarial cost requirements and amortization of the unfunded liability without being subject to the General Assembly's appropriation process. However, the State's 50-year funding plan does *not* meet the more stringent 40-year minimum amortization "parameters" required to be reported in the State's financial statements in accordance with GASB Statement 27.

ECONOMIC CONDITION AND OUTLOOK

Following nine consecutive years of economic growth, the Illinois economy entered a recessionary period during fiscal year 2002 whose impact was magnified following the September 11th tragedy. For the present, the slow down in business investment and the economies of our international trading partners as well as the surge in energy prices has more than offset the impact of continued strong consumer spending and relatively low interest rates in continuing the period of slow economic growth. Future performance of the economy depends on whether the promise that productivity enhancing new technology introduced as part of the information technology revolution will lead to a period of sustained growth comes true.

Fiscal year 2002 saw the Illinois economy lose 82,000 non-agricultural jobs (a 1.4% decline). As a result, the Illinois unemployment rate increased to 5.9% following five consecutive years of unemployment rates below 5%. This followed a period of steady employment growth as Illinois experienced an 828,000 or 15.9% employment increase between fiscal years 1992 and 2001. Fiscal year 2002 employment was still 746,000 or 14.6% greater than its decade earlier level. Illinois has many innovative aggressive businesses able to compete on an equal footing with competitors throughout the World who will be able to generate new jobs for Illinoisans when the economy revives.

Home to major exporters such as Caterpillar and Motorola, Illinois merchandise exports totaled \$31.8 billion during 2001 – sixth highest among the states. Illinois exports were down 1.4% in calendar 2001 due to a strong dollar and a weak world economy. Illinois exports were up 56.3% between 1993 and 2001 compared to a 57.3% increase in the value of total U.S. exports during this period.

Manufacturing exports are led by industrial machinery accounting for 24.8% of exports in 2001 followed by computers and electronic equipment accounting for 16.7%. The next four largest manufacturing export sectors were chemical products (14.5%), electrical equipment, appliances, and components (6.9%), transportation equipment (6.9%), and food products (5.5%).

Illinois ranked fifth in agricultural export sales in 2001 with total agricultural exports valued at \$3.1 billion up almost \$100 million or 2.7% from the prior year. Specialization in corn and soybean production is reflected in Illinois' rank as the second largest exporter of each crop. The tightest grain and oilseed supplies in several years are boosting prices and forcing adjustments for end users. Despite healthier prices, the uncertainty facing the farm sector has tempered the recovery for Illinois' farm supply, equipment, and support industries.

Illinois' success in the competitive world market has been based on technical expertise and a strong resource base rather than low labor costs as the state has maintained its position as one of the country's wealthiest states. Illinois per capita income during fiscal year 2002 stood at \$3,205, 7.7% or \$2,400 greater than the national average.

The Illinois economy takes advantage of its many natural strengths. During 2001, the State was the second largest producer of corn and soybeans and the fourth largest producer of hogs. Illinois agri-business has developed to add value to these products. Illinois is the number one ethanol producer among the states. With such major Illinois companies as Archer Daniels Midland and A.E. Staley (both headquartered in Decatur, the soybean capital of the world), Illinois produces a wide variety of specialized products based on corn and soybeans.

Illinois continues to be home to major producers of heavy equipment. Examples include agricultural equipment (such as the Deere plants in the Quad Cities), construction equipment (Caterpillar, which is based in Peoria and is the world's largest earth moving equipment company), and machine tools (a specialty of the Rockford area). From a low of 921,000 jobs during fiscal year 1992, Illinois manufacturing payrolls recovered to 977,000 jobs in fiscal year 1998. In the past four years, manufacturing employment has again declined, falling to 892,000 jobs in fiscal year 2002.

Illinois' central location makes it the logical transportation hub for the nation. Illinois is home to O'Hare airport, one of the nation's largest, and an excellent highway and railroad network. The low distribution costs from basing an operation in Illinois allow for the continued generation of new jobs in transportation and merchandising. During fiscal year 2002, 349,000 Illinoisans were employed in the transportation, communications, and public utilities sector, while over 1.3 million were employed in wholesale and retail trade.

The State's role as the central distribution point for agricultural commodities allowed it to develop the world's leading futures market. Illinois continues to be a national leader in financial industries such as banking, derivatives trading, and insurance and is corporate headquarters for many of the country's leading financial services companies. Finance, insurance, and real estate firms employed an average of 403,000 Illinoisans during the year.

Illinois serves as the logical corporate headquarters for many Midwest-based companies. Illinois is home to 36 of the Fortune 500 companies, ranking fourth among the states, trailing only New York, California, and Texas. With its excellent communications and transportation facilities and its strong legal, accounting, financial, and advertising resources, Illinois is also the home to many regional headquarters of major multi- national companies.

Illinois' reputation for research and technical innovation is well founded. Illinois is home to major government research laboratories such as the Argonne National Laboratory and the Fermi National Accelerator Lab, major private research labs such as those operated by BP Amoco and Lucent Technologies, major private universities including Northwestern University and the University of Chicago, and the State's network of nine public universities including the University of Illinois home of the Beckman Institute. The brainpower generated from these institutions continues to make Illinois a major center for technological advancement and a logical location for the production of advanced products.

Forecast for the Future

The most recent economic forecast for the Illinois economy prepared by the Global Insight consulting firm sees a further drop in Illinois employment in fiscal year 2003 followed by resumption of moderate Illinois employment growth during calendar 2004. The 0.8% annual average increase in Illinois employment between fiscal years 1997 and 2002 is forecast to drop slightly to 0.7% for the period between fiscal years 2002 and 2007. The strengths of the Illinois economy continue to be its diversified economy and its role as the regional center for finance, trade and exports.

The longer-term forecast expects continued growth in the Illinois economy with an increase in the share of jobs in the service sectors. Between fiscal years 2002 and 2012, Illinois is expected to add 492,000 jobs, an 8.3% increase. While service employment is forecast to increase by 228,000 jobs or 12.3%, continued automation of production processes is expected to cause manufacturing employment to remain flat during the period.

The long term forecast is vulnerable to unexpected economic fluctuations. Traditionally, the Illinois economy, with its emphasis on durable manufacturing, has been extremely sensitive to the business cycle. However, the increased emphasis on services and finance in the Illinois economy and better control over inventories by manufacturers are likely to reduce the impact of economic downturns on Illinois.

Long-Term Demographic Trends

The steady increase in the Illinois population is expected to continue into the twenty-first century. The current Illinois Bureau of the Budget estimate (1997), which is based on 1990 Census data, predicts that the Illinois population will increase from 11.4 million in 1990 to 13.3 million in 2020. It appears the official forecast has underestimated Illinois population growth as the 2000 Census report of 12,419,293 Illinoisans exceeds the 12,134,344 estimate. As the detailed information from the 2000 Census becomes available, revised population estimates will be prepared.

As the baby boom generation ages, a shift in the age distribution of the Illinois population is expected that will have an impact on the types of services demanded from state government. In 1990, 39.8% of the Illinois population was in the 20-44 age group and 18.7% was in the 45-64 age group. In 2020, the portion in the 20-44 bracket is expected to decline to 37.1% with the 45-64 share increasing to 22.0%. As the baby boom reaches age 65 after 2015, the population will age fairly quickly and a significant increase in the proportion of elderly is expected.

REQUESTS FOR INFORMATION

This financial report is designed to provide citizens, taxpayers, customers, investors and creditors a general overview of the State's financial position and changes in the State's net assets for the year ended June 30, 2002. If you have any questions about this report or need additional financial information, contact the Office of the Comptroller at (217) 782-6000.

The State's component units issue their own separately issued audited financial statements and reports. These statements and reports may be obtained by directly contacting the component unit. Contact information can be obtained from the Office of the Comptroller at (217) 782-6000.

State of Illinois Reconciliation of Governmental Funds Balance Sheet to Statement of Net Assets June 30, 2002 (Expressed in Thousands)

Total fund balances-governmental funds		\$ 249,963
Amounts reported for governmental activities in the Statement of Net Assets are different because:		
Capital assets used in governmental activities are not financial resources and therefore are not reported in the funds.		15,889,518
Prepaid expenses for governmental activities are current uses of financial resources for funds		10,915
Bond issuance costs are reported as current expenditures in the funds. However, bond issuance costs are deferred and amortized over the life of the bonds and are included as governmental activities in the Statement of Net Assets.		9,901
Internal service funds are used to charge costs of certain activities to individual funds. The assets and liabilities of the internal service funds are reported as governmental activities in the Statement of Net Assets.		133,907
Revenues in the Statement of Activities that do not provide current financial resources are deferred in the funds.		568,360
Bond refunding costs are reported as current expenditures in the funds. However, bond refunding costs are deferred and amortized over the life of the defeased bonds and are included as governmental activities in the Statement of Net Assets.		28,065
Some liabilities reported in the Statement of Activities do not require the use of current financial resources and therefore are not reported as liabilities in governmental funds. These activities consist of:		
Net pension obligation General obligation bonds Special obligation bonds Unamortized premiums Other commitments Compensated absences Certificates of participation Workers' compensation Capital lease and installment purchase obligations Accrued interest	(14,633,026) (8,405,437) (2,003,353) (111,782) (54,995) (531,466) (138,090) (125,903) (44,263) (98,954)	(26,147,269)
Net assets of governmental activities		\$ (9,256,640)

State of Illinois Reconciliation of Statements of Revenues, Expenditures and Changes in Fund Balances of Governmental Funds to Statement of Activities For the Year Ended June 30, 2002 (Expressed in Thousands)

Net change in fund balances Change in inventories		\$ (2,790,573) 1,485
g		(2,789,088)
Amounts reported for governmental activities in the Statement of Activities are different because:		
Governmental funds report capital outlays as expenditures while governmental activities report depreciation expense to allocate those expenditures over the life of the assets. This is the amount by which capital outlays exceeded depreciation in the current period.		773,697
Bond proceeds and other financing sources proceeds provide current financial resources to governmental funds, but the issuance increases long-term obligations in the Statement of Net Assets. In the current period, proceeds were received from:		
Bonds obligations including premiums of \$117,461 Other financing obligations	(2,421,506) (7,080)	
Total proceeds		(2,428,586)
Bond issue costs are reported as current expenditures in the funds. However, deferred issuance costs are amortized over the life of the bonds and are included in the governmental activities in the Statement of Net Assets.		10,361
Repayment of long-term debt is reported as an expenditure in governmental funds, but the the repayment reduces long-term liabilities in the Statement of Net Assets. In the current year, these amounts consist of:		
Bond principal retirements Capital lease principal payments	640,206 15,427	
Certificates of participation principal retirements	7,920	
Other financing obligations principal payments Payments to the bond refunding agent	7,047 697,084	
Total repayments	097,004	1,367,684
Some capital additions were financed through capital leases. In governmental funds, a capital lease arrangement is considered a source of financing, but in the Statement of Net Assets the lease obligation is reported as a liability.		(21,829)
Internal service funds are used to charge to costs of certain activities to individual funds. The net revenue of the internal service funds is reported as governmental activities in the		
Statement of Activities.		4,766
Revenues in the Statement of Activities that do not provide current financial resources are not reported as revenues in the funds.		(41,858)
Prepaid expenses in the Statement of Net Assets are not reported as expenses in governmental funds.		10,915
Proceeds from sales of capital assets are reported in the governmental funds. However, in the Statement of Activities, losses from the sale of capital assets are also reported.		(22,402)
This is the amount the losses from the sale of capital assets exceeded proceeds.		(33,492)
Some expenses reported in the Statement of Activities do not require the use of current financial resources and therefore are not reported as expenditures in governmental funds. Below are such activities.		
Increase in net pension obligation	(912,312)	
Increase in compensated absences obligation Interest accreted on capital appreciation debt	(7,155) (116,794)	
Deferred loss on current year refundings of debt	46,533	
Redemption premiums for refundings of debt	(10,156)	
Accrued interest paid to refunding agent Amortization of bond premiums	(32,123) 5,679	
Amortization of bond issuance costs	(460)	
Amortization of deferred loss on refundings of debt Decrease in workers' compensation obligation	(18,468) 8,946	
Increase in accrued interest on obligations	(19,974)	
Increase in other obligations	(375)	(1,056,659)
Change in net assets of governmental activities		\$ (4,204,089)

The accompanying notes to the financial statements are an integral part of this statement.

STATE OF ILLINOIS

Notes to the Financial Statements June 30, 2002

1

SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

A. Basis of Presentation

The accompanying financial statements of the State of Illinois have been prepared in conformity with accounting principles generally accepted in the United States of America ("GAAP") as prescribed in pronouncements of the Governmental Accounting Standards Board ("GASB").

B. Financial Reporting Entity

The State of Illinois is a "primary government" whose financial statements consist of the primary government, organizations for which the primary government is financially accountable and other organizations for which the nature and significance of their relationship with the primary government are such that exclusion would cause the reporting entity's financial statements to be misleading or incomplete. The financial statements include all funds, elected offices, departments and agencies as well as boards. commissions, authorities and universities for which the State's elected officials are financially Financial accountability exists accountable. when the State's governing body appoints a majority of an organization's governing board and (1) the State can impose its will upon the organization or (2) there is a potential for the organization to provide specific financial benefit to, or impose specific financial burdens on the State.

The State's governing body consists of the legislative, executive and judicial branches of government. The legislative function is controlled by an elected General Assembly composed of a 59-member Senate and a 118-member House of Representatives. The executive branch consists of the Governor (the chief executive of the State), the Lieutenant

Governor, the Attorney General, the Secretary of State, the Comptroller and the Treasurer. The judicial branch is composed of a seven-member Supreme Court, five Appellate court districts and twenty-two Circuit Court judicial districts including Cook County.

The financial statements distinguish between the "primary government" and its "component units." The State's participation in a joint venture, related organizations and jointly governed organizations is separately disclosed below. The government, which consists primary organizations that make up the State's legal entity, is the nucleus of the State's reporting entity. Component units are legally separate organizations for which the State is financially accountable. Complete financial statements of the individual component units can be obtained respective component administrative offices (as listed in parentheses below).

Blended Component Units

The following component units are reported, as exclusion would be misleading to the State's financial statements, as though they are a part of the primary government using the blending method since they provide services primarily to benefit the State:

IMSA Fund for Advancement of Education
 ("IMSA Fund"): The IMSA Fund was
 established for the purpose of benefiting,
 performing the function of and carrying out
 certain charitable, educational, literary and
 scientific purposes of the Illinois
 Mathematics and Science Academy, a
 primary government agency. (Administrative
 Offices: 1500 West Sullivan Road, Aurora,
 Illinois 60506-1000).

2. Office of the Special Deputy Receiver ("OSD"): The OSD acts as agent for the State of Illinois in supervising the conservation, rehabilitation or liquidation of insurance companies. The OSD reports on a December 31 year-end. (Administrative Office: 222 Merchandise Mart Plaza, Suite 1450, Chicago, Illinois 60654).

Discretely Presented Component Units

Discretely presented component units are reported in separate columns to emphasize that they are legally separate from the State. The discretely presented component units presented below have governing bodies appointed by the governing board of the State.

- Illinois Housing Development Authority ("IHDA"). The IHDA issues notes and bonds to make loans for the acquisition, construction and rehabilitation of housing and to encourage home ownership. The State approves bonds and notes issued by the IHDA and is secondarily liable for its debt if there are not sufficient IHDA monies pav principal and interest. (Administrative Offices: 401 North Michigan Avenue, Suite 900, Chicago, Illinois 60611).
- 2. Illinois State Toll Highway Authority ("THA"). The THA operates a toll highway system to promote the public welfare and to facilitate vehicular traffic by providing convenient, safe, modern and limited access highways within Illinois. The State substantially approves the THA's budget. The THA reports on a December 31 yearend. (Administrative Offices: One Authority Drive, Downers Grove, Illinois 60515). The THA has no amounts reported as due from or to the primary government or other component units at December 31, 2001. At June 30, 2002, THA would report a due to the primary government of \$1,663 and a due to component units of \$337.
- 3. Illinois Distance Learning Foundation ("Foundation"). The Foundation promoted

- increased use of communication and information technology in rural school districts in the State of Illinois in order to improve curriculum, access to skilled faculty, parental participation and adult education opportunities. The State had the ability to appoint, hire, reassign and dismiss those persons responsible for the day-to-day operations of the Foundation. The Foundation was abolished during the fiscal year. (Administrative Offices: 305 Stratton Building, Springfield, Illinois 62706).
- 4. Illinois Literacy Foundation ("Foundation"). The Foundation promotes literacy among the residents of the State of Illinois by supporting literacy programs and enhancing Statewide literacy awareness. The State has the ability to appoint, hire, reassign and dismiss those responsible for the day-to-day operations of the Foundation. (Administrative Offices: 124 Howlett Building, Springfield, Illinois 62756)
- Community Development Finance Corporation ("Corporation"). The Corporation assists various community development corporations to economic redevelopment in designated areas within the State of Illinois. The State has the ability to hire, reassign and dismiss those persons responsible for the day-to-day operations of the Foundation. (Administrative Offices: 300 West Jefferson, Springfield, Illinois 62702).
- 6. Illinois Grain *Insurance* **Corporation** ("Corporation"). The Corporation was created for the purpose of improving the economic stability of agriculture in the State of Illinois by establishing a fund to pay grain producers and other claimants for losses incurred by the failure of a grain dealer or warehouseman. The State has the ability to remove appointed members of the Corporation's governing board at will. (Administrative Offices: State Fairgrounds, Springfield, Illinois 62794).

- 7. Illinois Conservation **Foundation** ("Foundation"). The Foundation was created to promote, support, assist, sustain and encourage the charitable, educational, scientific and recreational programs, projects and policies of the Illinois Department of Natural Resources. The State has the ability to appoint, hire, reassign, and dismiss those persons responsible for the day-to-day Foundation. operations of the (Administrative Offices: 524 South Second Street, Springfield, Illinois 62701-1787).
- 8. Comprehensive Health Insurance Plan ("CHIP") Board. The CHIP provides an alternate market for health insurance for eligible Illinois residents having a pre-existing health condition. The State substantially approves the CHIP's budget. (Administrative Offices: 400 West Monroe Street, Suite 202, Springfield, Illinois 62704).
- East St. Louis Financial Advisory Authority
 ("Authority"). The Authority was created to
 provide a secure financial basis for and to
 furnish assistance to the city of East St.
 Louis. The State funds certain programs of
 the Authority. (Administrative Offices: 10
 Collinsville Avenue, East St. Louis, Illinois
 62201).
- 10. Illinois Farm Development Authority The Authority develops ("Authority"). various programs designed to maintain and promote the agricultural economy of the State of Illinois. The State is secondarily liable for payment of principal and interest issued bv the debt Authority. (Administrative Offices: 427 East Monroe, Suite 201, Springfield, Illinois 62701).
- 11. Illinois Development Finance Authority ("IDFA"). The IDFA provides funding for industrial, commercial and manufacturing development in areas of Illinois with critical unemployment. The State funds certain programs of the IDFA. (Administrative Offices: 233 South Wacker Drive, Suite 5310, Chicago, Illinois 60606).

- 12. Illinois Rural Bond Bank ("Bond Bank"). The Bond Bank provides assistance to rural governmental units by providing adequate capital markets and facilities for borrowing money and financing public improvements at low interest rates. The State is secondarily liable for payment of principal and interest on debt issued by the Bond Bank. Excess reserves of the Bond Bank must be returned to the State's General Fund. (Administrative Offices: 427 East Monroe Street, Suite 202, Springfield, Illinois 62701).
- 13. Illinois Medical District Commission ("Commission"). The Commission was created to maintain and expand a designated "medical district." The State substantively approves the Commission's budget. (Administrative Offices: 600 South Hoyne, Chicago, Illinois 60612).
- 14. Quad Cities Regional Economic Development Authority ("Authority"). The Authority promotes economic development within the counties of Rock Island, Henry and Mercer in the State of Illinois. The State approves bonds and notes issued by the authority and is secondarily liable for its debt if there are not sufficient Authority monies to pay principal and interest. (Administrative Offices: 1504 3rd Avenue, Box 3368, Rock Island, Illinois 61204-3368).
- 15. Southwestern Illinois Development Authority ("Authority"). The Authority promotes economic development within the counties of St. Clair and Madison in the State of Illinois. The State approves bonds and notes issued by the authority and is secondarily liable for its debt if there are not sufficient Authority monies to pay principal and interest. (Administrative Offices: 1022 Eastport Plaza, Collinsville, Illinois 62234).
- 16. Upper Illinois River Valley Development Authority ("Authority"). The Authority promotes economic development within the counties of Grundy, LaSalle, Bureau,

Putnam, Kendall, Kane, McHenry and Marshall in the State of Illinois. The State approves bonds and notes issued by the authority and is secondarily liable for its debt if there are not sufficient Authority monies to pay principal and interest. (Administrative Offices: 321 West Main Street, Ottawa, Illinois 61350).

- 17. Boards of Trustees of Chicago State University ("CSU"), Eastern Illinois ("EIU"), University Governors State University ("GSU"), Northeastern Illinois University ("NEIU"), Northern Illinois ("NIU"), University Western Illinois University ("WIU"), Illinois State ("ISU"), University Southern Illinois University ("SIU") and University of Illinois ("U of I") ("boards"). The boards of the respective universities operate, manage, control and maintain the schools. The State provides significant financial support to the boards of the universities. Certain universities have donor restricted endowments that are restricted as to spending by the donor which are detailed in their separately issued financial statements. The Uniform Management of Institutional Funds Act permits the boards to spend net appreciation of endowments as they determine to be prudent. (Administrative Offices:
 - CSU, 9501 South King Drive, Chicago, Illinois 60628
 - EIU, 113 West Old Main, Charleston, Illinois 61920
 - GSU, Route 54 & Stuenkel Road, University Park, Illinois 60466
 - NEIU, 5500 North St. Louis Avenue, Chicago, Illinois 60625
 - NIU, 104 Altgeld Hall, DeKalb, Illinois 60115.
 - WIU, 1 University Circle, Macomb, Illinois 61455
 - ISU, Campus Box 1200, Normal, Illinois 61790-1200
 - SIU, Colyer Hall, Carbondale, Illinois 61801.
 - U of I, 346 Administration Building, 506 South Wright, Urbana, Illinois 61801.)

The following component unit must obtain the State's approval for debt issuances:

1. Will-Kankakee Regional Development Authority ("Authority"). The Authority promotes economic development within the counties of Will and Kankakee in the State of Illinois. The State approves bonds and notes issued by the Authority and is secondarily liable for its debt if there are not sufficient Authority monies to pay principal and interest. (Administrative Offices: 116 North Chicago Street, Two Rialto Square, Joliet, Illinois 60431).

Excluding the following component units from the State's financial statements would be misleading and therefore the component units are included because of the nature of the component units' relationship with the State:

- 1. Illinois Health Facilities Authority ("Authority"). The Authority provides assistance and alternative methods of financing private and public institutions, which are consistent with the orderly and economic development of health facilities and services. (Administrative Offices: 180 North Stetson, Suite 1100, Chicago, Illinois 60601).
- 2. Illinois Educational Facilities Authority ("Authority"). The Authority provides taxexempt financing for the acquisition or construction of educational facilities and education loans for private institutions of higher education, certain related not-forprofit academic institutions, private cultural institutions and education loan corporations within the State of Illinois. (Administrative Offices: 105 West Orchard Street, Itasca, Illinois 60143).

Joint Venture

The State is a participant with the states of Michigan, Minnesota, New York, Ohio, Pennsylvania and Wisconsin in the Great Lakes Protection Fund ("Fund"), an Illinois not-for-profit corporation. The fund is the nation's first multi-state environmental endowment and was established in 1989 for furthering Federal and

State commitments to programs that restore and maintain the Great Lakes' water quality. This purpose is achieved by providing grant money for projects that promote the objectives of the regional Great Lakes Toxic Substance Control Agreement and the binational Great Lakes Water Quality Agreement.

A state becomes a member of the Fund by agreeing to contribute an amount set forth in the Articles of Incorporation. The required contribution from all member states at incorporation was \$81 million. The Fund's net assets on December 31, 2001 were \$118 million.

Once a state agrees to make the required contribution, that state's governor becomes a "member" of the Fund. Each member is entitled to appoint two individuals to the board of directors. Budgetary and financial decisions rest with the board of directors except where restricted by the Articles of Incorporation. Twothirds of the Fund's income is used to finance projects compatible with the organization's objectives as set forth in the Articles of The remaining one-third of Incorporation. income is paid to member states in proportion to the amount and period of time that each state's contribution was invested with the Fund ("state shares"). Illinois received a State share for 2001 of \$177 thousand. The affirmative vote of all of the members is required for all actions of the Fund. Complete financial statements of the Fund can be obtained from the Fund's Administrative Offices at 1560 Sherman Avenue, Suite 880, Evanston, Illinois 60201.

Related Organizations

The State's officials are also responsible for appointing the majority of the boards of other organizations, but the State's accountability does not go beyond making the appointments. The State, generally the Governor, in certain instances with the advice and consent of the Senate, appoints the members of the following boards:

- Central Midwest Interstate Low-Level Radioactive Waste Commission
- Havana Regional Port District
- Kaskaskia Regional Port District
- Mt. Carmel Regional Port District
- Shawneetown Regional Port District

- Southwest Regional Port District
- Tri-City Regional Port District
- Waukegan Port District
- White County Regional Port District
- Illinois Community College System Foundation

The State maintains accounting records for the Central Midwest Interstate Low-Level Radioactive Waste Commission. This is the only related party activities that the State has with the above organizations.

Jointly Governed Organizations

The State's officials, in conjunction with various other state and local government officials, are members of the boards of other organizations. However, the State has no ongoing financial interest or responsibility except the role of a participant in the various organizations' purpose and, in certain instances, pays annual dues or assessments. The Governor, sometimes with the advice and consent of the Senate, appoints the number of board members (as indicated in parentheses below) the following of organizations:

- Bi-State Development Agency of the Missouri/Illinois Metropolitan District (5 of 10)
- Education Commission of the States (7 of approximately 350)
- Illinois Valley Regional Port District (2 of 5)
- Interstate Mining Commission (1 of 17)
- Jackson/Union Counties Regional Port District (4 of 23)
- Joliet Regional Port District (3 of 7)
- Lawyers Trust Fund (3 of 9)
- Midwestern Higher Education Commission (5 of 60)
- Northeastern Illinois Planning Commission (5 of 34)
- Ohio River Valley Water Sanitation Commission (3 of 24)
- Southwestern Illinois Metropolitan & Regional Planning Commission (8 appointed)
- Wabash Valley Interstate Commission (7 of 14)

The State has no significant related-party activities with the above organizations.

C. Basis of Presentation

Government-wide Financial Statements

The statement of net assets and the statement of activities display information about the primary government (the State) and its component units. These statements include the financial activities of the overall government, except for fiduciary Eliminations have been made to activities. minimize the double counting of internal activities. These statements distinguish between the governmental and business-type activities of the State and between the State and its discretely presented component units. Governmental activities generally are financed through taxes, intergovernmental revenues and other nonexchange transactions. Business-type activities are financed in whole or in part by fees charged to external parties.

The Statement of Net Assets presents the reporting entity's non-fiduciary assets and liabilities, with the difference reported as net assets. Net assets are reported in three categories:

- Invested in capital assets, net of related debt consists of capital assets, net of accumulated depreciation and reduced by outstanding balances for bonds, notes and other debt that are attributed to the acquisition, construction or improvement of those assets.
- Restricted net assets result when constraints placed on net asset use are either externally imposed by creditors, grantors, contributors and the like, or imposed by law through enabling legislation.
- Unrestricted net assets consist of net assets, which do not meet the definition of the two preceding categories. Unrestricted net assets often are designated, to indicate that management does not consider them to be available for general operations. They often have resources that are imposed by management, but can be removed or modified.

The Statement of Activities presents a comparison between direct expenses and program revenues for the different business-type activities of the State and for each function of the State's governmental activities. Direct expenses are those that are specifically associated with a program or function and, therefore, are clearly identifiable to a particular function. Program revenues include (a) charges paid by the recipients of goods or services offered by the programs and (b) grants and contributions that are restricted to meeting the operational or capital requirements of a particular program. Revenues that are not classified as program revenues, including all taxes, are presented as general revenues.

Fund Financial Statements

The fund financial statements provide information about the State's funds, including fiduciary funds and blended component units. Separate statements for each fund category-governmental, proprietary, and fiduciary-are presented. The emphasis on fund financial statements is on major governmental and enterprise funds, each displayed in a separate column. All remaining governmental and enterprise funds are aggregated and reported as nonmajor funds.

Proprietary fund operating revenues, such as charges for services, generally result from exchange transactions associated with the principal activity of the fund. Exchange transactions are those in which each party receives and gives up essentially equal values. Nonoperating revenues, such as subsidies and investment earnings, generally result from nonexchange transactions or ancillary activities.

The State reports the following major governmental funds:

General – This is the State's primary operating fund. It accounts for all financial resources of the general government, except those required to be accounted for in another fund. These services include, among others, employment and economic development, education (other than institutions of higher

education), and health and social services. Certain resources obtained from federal grants and used to support general governmental activities are accounted for in the General Fund consistent with applicable legal requirements. The State's General Fund contains four primary sub-accounts (General Revenue, Education Assistance, Common School and Medicaid Provider Assessment Program) with numerous secondary sub-accounts.

Road – This fund accounts for the activities of the State highway programs including highway maintenance and construction, traffic control and safety and administering motor vehicle laws and regulations. Funding sources include federal aid, State motor fuel taxes and various license and fee charges.

Motor Fuel Tax – This fund accounts for the activities of various transportation related program expenditures and the administrative cost of supervising the use of funds apportioned to municipalities, counties and road districts. Funding sources include State motor fuel taxes and an allocation (transfer) of State sales tax collections from the General Fund.

State Construction Account – This fund accounts for the construction, reconstruction and maintenance of the State maintained highway system. Funding sources include a portion of motor vehicle registration fees, weight taxes and transfers from the Motor Fuel Tax Fund.

The State reports the following major proprietary funds:

Unemployment Compensation Trust – This fund accounts for the activities of the unemployment insurance program including employer contributions, Federal Unemployment Trust advances and benefit claims.

Water Revolving — This fund accounts for the activities of a revolving loan program for local government drinking water and sewage treatment infrastructure. Certain loans receivable in the fund are restricted due to revenue bond covenants.

Illinois Designated Account Purchase Program –This fund accounts for the activities of the Illinois Designated Account Purchase Program including issuance of bonds and acquisition of student loans from lenders. Certain assets in the fund are restricted due to revenue bond covenants.

Additionally, the State reports the following fund types:

Governmental Fund Types:

Special Revenue - These funds account for resources obtained from specific revenue sources that are legally restricted to expenditures for specified purposes. Special revenues funds account for, among other things, federal grant programs, taxes levied with statutorily defined distributions and other resources restricted as to purpose.

Debt Service - These funds account for governmental resources obtained and accumulated to pay interest and principal on general long-term obligations (other than capital leases, workers' compensation and unfunded retirement costs).

Capital Projects - These funds account for resources obtained and used for the acquisition or construction of major capital facilities. Such resources are derived principally from proceeds of general and special obligation bond issues and certificates of participation.

Permanent Trust - These funds account for resources that are legally restricted to the extent that only earnings, and not principal, may be used for purposes that benefit the government or its citizens.

Proprietary Fund Types:

Enterprise - These funds account for operations where the intent of the State is that the cost of providing goods or services to the general public on a continuing basis be financed or recovered primarily through user charges.

Internal Service – These funds account for data processing, printing, fleet management, telecommunications and medical and dental benefits for State employees provided to agencies of the State on a reimbursement basis.

Fiduciary Fund Types:

Pension (and Other Employee Benefit)
Trust – These funds account for resources that are required to be held in trust for the members and beneficiaries of the State's five Public Employee Retirement Systems (PERS) and the Deferred Compensation Plan Fund.

Investment Trust – These funds account for the external portion of investment pools sponsored by the State including the Public Treasurer's Investment Pool and the Deferred Lottery Prize Winners Trust Fund.

Private Purpose Trust – These funds account for resources legally held in trust for use by individuals, private organizations and other governments. There is no requirement that any portion of these resources be preserved as capital.

Agency – These funds account for the various taxes, deposits, deductions and property collected by the State, acting in the capacity of an agent, for distribution to other governmental units or designated beneficiaries.

Component Units:

The State reports the following major component units:

<u>Illinois Housing Development Authority</u>—This Authority makes loans and issues notes and bonds for the acquisition, construction, and rehabilitation of housing and to make loans to encourage home ownership.

Illinois State Toll Highway Authority--This Authority operates a toll highway system to promote the public welfare, and to facilitate vehicular traffic by providing convenient, safe, modern, and limited access highways within Illinois.

Board of Trustees of Illinois State University-This Board operates, manages, controls, and maintains Illinois State University. The Board was created on January 1, 1996 with the dissolution of the Board of Regents.

Board of Trustees of Northern Illinois University--This Board operates, manages, controls, and maintains Northern Illinois University. The Board was created on January 1, 1996 with the dissolution of the Board of Regents.

Board of Trustees of Southern Illinois University--This Board operates, manages, controls, and maintains Southern Illinois University. The Board was created on July 1, 1949. Southern Illinois University consists of campuses at Carbondale and Edwardsville. In addition, the University operates a medical school.

Board of Trustees of University of Illinois-This Board manages the University of Illinois. The Board is a separately elected body created by law on July 1, 1876. The University of Illinois consists of campuses at Champaign-Urbana, Springfield, and Chicago. In addition, the University operates a medical school.

The State appropriates support monies for university programs, capital projects and onbehalf retirement and insurance payments which are recorded in the general revenue category of State appropriations on the Statement of Net Assets for component units.

D. Measurement Focus and Basis of Accounting

Government-wide, Proprietary and Fiduciary Fund Financial Statements

The government-wide, proprietary and fiduciary fund financial statements are reported using the economic resources measurement focus and the accrual basis of accounting. Revenues are recorded when earned and expenses are recorded at the time liabilities are incurred, regardless of when the related cash flow takes place. Nonexchange transactions, in which the State gives (or receives) value without directly receiving (or giving) equal value in exchange, include income taxes, excise taxes, wealth taxes, grants, entitlements and donations. On an accrual basis, revenues from self assessed taxes, principally income, excise and wealth taxes, are recognized in the fiscal year in which the underlying exchange transaction occurs. Revenue from grants, entitlements and similar items are recognized in the fiscal year in which all eligibility requirements imposed by the provider have been met.

Governmental Fund Financial Statements

Governmental funds are reported using the current financial resources measurement focus and the modified accrual basis of accounting. Revenues are recognized as soon as they are both measurable and available. Revenues are considered to be available when they are collectible within the current period or soon enough thereafter to pay liabilities of the current period. For this purpose, the State considers revenues to be available if they are collected within 60 days of the end of the current fiscal year. Expenditures generally are recorded when the liability is incurred, as under accrual accounting. However, principal and interest on general long-term debt, claims and judgments and compensated absences are recorded only when General capital asset payment is due. acquisitions are reported as expenditures in governmental funds. Proceeds of general longterm debt and acquisitions under capital leases are reported as other financing sources.

Significant revenue sources which are susceptible to accrual include individual and corporate income taxes, sales taxes, public utility taxes, motor fuel taxes and interest. All other revenue sources including fines, penalties, licenses and other miscellaneous revenues are considered to be measurable and available only when cash is received.

Private-Sector Standards

Private-sector standards of accounting and financial reporting issued prior to December 1, 1989, generally are followed in both the government-wide and proprietary fund financial statements to the extent that those standards do not conflict with or contradict guidance of the Governmental Accounting Standards Board. The State also has the option of following subsequent private-sector guidance for their business-type activities and enterprise funds, subject to this same limitation. The State generally has elected not to follow subsequent private-sector guidance.

The following major agencies, departments or component units, however, have elected to apply all applicable private-sector standards (i.e. statements and interpretations of the Financial Accounting Standards Board):

- Illinois Student Assistance Commission
- Comprehensive Health Insurance Plan Board
- Illinois Farm Development Authority

E. Eliminations

Eliminations have been made in the government-wide statement of net assets to minimize the "grossing-up" effect on assets and liabilities within the governmental and business-type activities columns of the primary government. As a result, amounts reported in the funds as interfund receivables and payables have been eliminated in the governmental and business-type activities columns of the statement of net assets, except for the net residual amounts due between governmental and business-type activities, which are presented as internal balances. Amounts reported in the funds as receivable from or payable to fiduciary funds have been included in

the statement of net assets as receivable from and payable to external parties, rather than as internal balances.

Eliminations have been made in the statement of activities to remove the "doubling-up" effect of internal service fund activity. The effect of similar internal events that are, in effect, allocations of overhead expenses from one function to another or within the same function also have been eliminated, so that the allocated expenses are reported only by the function to which they were allocated.

F. Cash Equivalents

Cash equivalents are defined as short-term, highly liquid investments readily convertible to cash with original maturities of three months or less. Cash equivalents consist principally of certificates of deposit, repurchase agreements and U.S. treasury bills and are stated at cost.

G. Investments

Investments are reported at fair value. Generally, the State's pension systems' marketable securities are valued at closing prices listed on national securities exchanges and quotes from independent pricing services as of June 30. Real estate and venture capital are valued based upon appraisals and discounted cash flow analysis.

The Illinois Funds operates as a 2a7-like pool and thus reports all investments at amortized cost rather than market value. The fair value of the pool is the same as the value of the pool shares. The Treasurer's investment policies are governed by State statute. In addition, the Treasurer's Office has adopted its own investment practices that supplement the statutory requirement. The Treasurer's Office issues a separate financial report for The Illinois Funds. It may be obtained by contacting the Administrative Office at Jefferson Terrace, 300 West Jefferson Street, Second Level, Springfield, Illinois 62702.

Investment income is recorded as revenue in the General Fund, except for resources of retirement systems and certain other individual funds that are

statutorily authorized to be separately invested and specifically credited with the income realized thereon. The State's financial statements contain certain investments that meet the definition of "derivatives." Derivative investments are included in the pension trust funds are described in more detail in Note 3.

H. Inventories

For governmental funds, the State recognizes the costs of material inventories as expenditures when purchased. At year-end, physical counts are taken of significant inventories for the governmental fund types and are generally reported on the balance sheet at moving-average cost. Inventories reported in the governmental funds do not reflect current appropriable resources, and therefore, the State reserves an equivalent portion of fund balance.

I. Interfund Transactions

The State has the following types of interfund transactions:

Services provided and used—sales and purchases of goods and services between funds for a price approximating their external exchange value. Interfund services provided and used are reported as revenues in seller funds and expenditures or expenses in purchaser funds. Unpaid amounts at year-end are reported as interfund receivables and payables in the fund balance sheets or fund statements of net assets.

Reimbursements—repayments from the funds responsible for particular expenditures or expenses to the funds that initially paid for them. Reimbursements are reported as expenditures in the reimbursing fund and as a reduction of expenditures in the reimbursed fund.

Transfers—flows of assets (such as cash or goods) between funds without equivalent flows of assets in return and without a requirement for repayment. In

governmental funds, transfers are reported as other financing uses in the funds making transfers and as other financing sources in the funds receiving transfers. In proprietary funds, transfers are reported after nonoperating revenues and expenses.

J. Capital Assets

Capital assets, which includes property, plant, equipment and infrastructure, are reported at cost or estimated historical cost based on appraisals or deflated current replacement costs. Contributed assets are reported at estimated fair value at the time received.

Capitalization thresholds of the primary government generally are as follows:

Capital Asset Category	Capitalization Threshold		
Infrastructure Land Land Improvements Site Improvements Buildings Building Improvements Equipment Works of Art, Historical Treasures	\$\$\$\$\$\$\$\$\$	1,000,000 100,000 25,000 25,000 100,000 25,000 5,000	

Certain component units, however, may have adopted different capitalization thresholds. These thresholds can be obtained from their separately issued financial statements.

The costs of normal maintenance and repairs that do not add to the value of the asset or materially extend the asset's life are not capitalized.

Major capital outlays for capital assets and improvements are capitalized as project costs are incurred. Interest incurred during the construction phase of capital assets used in business-type activities is included as part of the capitalized value of the assets constructed.

Capital assets are depreciated using the straightline method over the following estimated useful lives:

Capital Asset Category	Estimated Useful Lives (In Years)
Infrastructure Land Land Improvements Site Improvements Buildings Building Improvements Equipment Works of Art, Historical Treasures	5-50 N/A N/A 3-50 10-60 10-45 3-25

K. Retirement Costs

Substantially all State employees, including members of the General Assembly and Judicial Branch, participate in one of three State public employee retirement systems (see Note 15). The State also maintains and funds public employee retirement systems for employees of the various State supported universities and for public school teachers in cities other than Chicago. It is the State's policy to fund retirement costs without regard to amounts calculated under the actuarial requirements. Based on actuarial consultations, the State's contributions have been less than the retirement benefits paid during the year for the last twenty-one fiscal years. Prior to fiscal year 1982, the State had funded the retirement costs at a level at least as great as the retirement benefits paid during the year.

Annual pension cost (APC) is recorded as an expense in the government-wide statement of activities and is comprised of the employer's (State's) annual required contribution (ARC), which equals normal cost plus interest on unfunded prior service costs and amortization of prior service cost over forty years, one year's interest on the net pension obligation and an adjustment to the ARC to offset the effect of actuarial amortization of past under or over contributions.

L. Capital Appreciation ("deep-discount") Bonds

Capital appreciation bonds are those bonds that are issued at stated interest rates significantly below their effective interest rate, resulting in a substantial discount. The implicit interest (i.e., discount) is not paid until the bonds mature. Therefore, the net value of the bonds "accrete" (i.e., the discount is reduced) over the life of the bonds. Capital appreciation bonds are reported in the government-wide statement of net assets at their accreted value.

M. Compensated Absences

The liability for compensated absences reported in the government-wide, proprietary and fiduciary fund financial statements consists of unpaid, accumulated vacation and sick leave balances. A liability for these amounts is reported in governmental funds only if they have matured, for example, as a result of employee resignations and retirements. The liability has been calculated using the vesting method, in which leave amounts for both employees who are currently eligible to receive termination payments and other employees who are expected to become eligible in the future to receive such payments are included. The liability has been calculated based on the employees' current salary level and includes salary related costs (e.g., social security and Medicare tax).

Legislation that became effective January 1, 1998 capped the paid sick leave for all State Employees' Retirement System members at December 31, 1997. Employees continue to accrue twelve sick days per year, but will not receive monetary compensation for any additional time earned after December 31, 1997.

Sick days earned between 1984 and December 31, 1997 (with a 50% cash value) would only be used after all days with no cash value are depleted. Any sick days earned and unused after December 31, 1997 will be converted to service time for purposes of calculating employee pension benefits.

Component unit financial statements also include a liability for compensated absences. However, they may have adopted different compensated absences policies. These policies can be obtained from their separately issued financial statements.

N. Bond Premiums, Discounts, and Issuance Costs

In the government-wide and proprietary fund financial statements, bond premiums and discounts, as well as issuance costs, are deferred and amortized over the life of the bonds using the effective interest method. Bonds payable are reported net of the applicable bond premium or discount. Bond issuance costs are reported as deferred charges and amortized over the term of the related debt.

In the fund financial statements, governmental fund types recognize bond premiums and discounts, as well as bond issuance costs, during the current period. The face amount of debt issued is reported as other financing sources. Premiums on debt issuances are reported as other financing sources while discounts on debt issuances are reported as other financing uses. Issuance costs, whether or not withheld from the actual debt proceeds received, are reported as debt service expenditures.

O. Advance Refundings of Debt

In the government-wide and proprietary fund financial statements, gains and losses from advance refundings of debt resulting in defeasance are deferred and amortized as a component of interest expense over the shorter of the remaining life of the old debt or the life of the new debt using the effective interest method. Bonds payable are reported net of these deferred gains and losses.

P. Net Assets/Fund Balances

The difference between fund assets and liabilities is "Net Assets" on governmental-wide, proprietary and fiduciary fund financial statements, and "Fund Balance" on governmental fund financial statements.

Fund balances of governmental funds that are legally restricted by outside parties for use for a specific purpose are reported as reservations of fund balance.

Q. Use of Estimates

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

R. New Accounting Pronouncements

Effective July 1, 2001, the State adopted the provisions of Governmental Accounting Standards Board Statement No. 34, Basic Financial Statements—and Management's Discussion and Analysis—for State and Local Governments; Statement No. 35, Basic Financial Statements—and Management's Discussion and Analysis—for Public College and Universities; and Statement No. 37, Basic Financial Statements and Management's Discussion and Analysis for State and Local Governments: These Statements establish new financial reporting requirements and significantly change the format and content of the State's They require new financial statements. information and restructure much of the information that the State has presented in the past.

Effective July 1, 2001, the State adopted the provisions of Governmental Accounting Standards Board Statement No. 38, *Certain Financial Statement Note Disclosures*. This Statement modifies, establishes, and rescinds certain financial statement note disclosures.

Effective July 1, 2001, the State adopted the provision of Governmental Accounting Standards Board Interpretation No. 6, Recognition and Measurement of Certain Liabilities and

Expenditures in Governmental Fund Financial Statements. This Interpretation clarifies the application of standards for modified accrual recognition of certain liabilities and expenditures in governmental funds. There was no significant impact on the State's financial statements as a result of adopting this Interpretation.

2

RESTATEMENT

The provisions of the new accounting standards issued by GASB, as discussed in Note 1-R, have been incorporated into the financial statements and notes. The following table summarizes (in thousands) changes to fund equities as previously reported on the Combined Balance Sheet. The changes resulted primarily from implementation of these GASB standards, however, other restatements to certain funds are discussed below.

The Income Tax Refund Fund, a sub-account of the General Fund, has been restated to reflect the correction of an error in accounting for amounts due to other funds. The Federal Student Loan Fund and the Federal Reserve Recall Fund, non-major governmental funds of the Illinois Student Assistance Commission, have been restated due to a change in the State's regulations for the reporting of fund balances of federal funds as liabilities to the Federal government rather than as fund balances. In addition, the General Fund, the Road Fund and other special revenue funds have been restated to properly display matured liabilities connected with workers compensation and auto liability.

DEPOSITS AND INVESTMENTS

The State Treasurer is the custodian of the State's cash, cash equivalents and investments for most funds maintained in the State Treasury. Funds maintained outside the State Treasury (locally held funds) have independent authority to manage their own cash and investments. As described later, the funds of the State's retirement systems are invested separately.

Investment Policy -

General

Statutes authorize public agencies, including the State of Illinois primary government and its component units, to engage in a wide variety of investment activities. These include bonds, notes, certificates of indebtedness, treasury bills or other securities guaranteed by the United interest-bearing savings accounts. States: certificates of deposit, interest-bearing time deposits or any other investments that constitute direct obligations of any bank; short-term obligations of certain qualified United States corporations; short-term discount obligations of the Federal National Mortgage Association; shares or other securities legally issued by certain state or federal savings and loan associations; insured dividend-bearing share accounts and certain other accounts of chartered credit unions; certain money market mutual funds; Public Treasurer's Pool; and repurchase agreements that instrument and transaction certain requirements. Statutes require that investments purchased must mature or be redeemable prior to the date they will be needed to pay expenditures.

The investments of the State's five retirement systems (classified as pension trust funds) are governed by the State Pension Code. Authorized investments consist of bonds, equities, real estate, venture capital and other activities that are consistent with the "prudent person" rule. The "prudent person" rule, as adopted by the Illinois General Assembly in 1982, states that fiduciaries must discharge their duties with the care, skill, prudence and diligence which a prudent person

acting in a like capacity and familiar with such matters would use under conditions prevailing at the time.

The Illinois State Board of Investment (ISBI) is considered to be an internal investment pool of the State of Illinois, operating solely from investment income. The Board manages and invests the pension assets of three of the State's retirement systems: General Assembly Retirement System, the Judges Retirement System, and State Employees' Retirement System.

In addition to statutory requirements, primary government agencies and component units have adopted their own supplemental investment practices, which further regulate such activities.

Derivatives

Certain State agencies, principally Teachers' Retirement System (TRS), ISBI and State Universities Retirement System (SURS), invest in derivative securities. These derivative securities have been authorized by the policies of the applicable State agencies and the Illinois Compiled Statutes. A derivative security is an investment whose return on investment depends upon the underlying value of other assets such as commodity prices, bond and stock prices or a market index. In general, a derivative is used to modify exposure to undesirable risks, to increase portfolio liquidity and flexibility or to enhance investment yields within the level of risk defined in the agency's investment guidelines.

Derivative transactions involve, to varying degrees, credit risk and market risk. Credit risk is the possibility that a loss may occur because a party to a transaction fails to perform according to the established terms. In order to eliminate credit risk, all derivative securities of TRS, ISBI and SURS are done through a clearinghouse which guarantees delivery and accepts the risk of

default by either party. Market risk is the possibility that a change in interest or currency rates will cause the value of a financial instrument to decrease or become more costly to The market risk associated with settle. derivatives, the prices of which are constantly fluctuating, is regulated by TRS, ISBI and SURS by imposing strict limits as to the types, amounts and degree of risk that investment managers may These limits are approved by undertake. governing bodies and senior management, and the risk positions of the investment managers are reviewed periodically to monitor compliance with limits.

TRS, ISBI and SURS invest in the following types of derivatives: foreign currency forward contracts, collateralized mortgage obligations, financial futures and financial options.

Foreign currency forward contracts are used to hedge against the currency risk in agencies' foreign stock and fixed income security portfolios. Foreign currency forward contracts are an agreement to buy or sell a specific amount of a foreign currency at a specified delivery or maturity date for an agreed upon price. Fluctuations in the market value of foreign currency forward contracts are recognized as incurred rather than at the maturity or settlement date of the contract. Foreign currency forward represent an off-balance contracts obligation because there are no balance sheet assets or liabilities associated with those contracts.

Financial futures are agreements to buy or sell a specific amount of an asset at a specified delivery or maturity date for an agreed-upon price. As the market value of the futures contract varies from the original contract price, a gain or loss is recognized and paid to the clearinghouse. Financial futures represent an off-balance sheet obligation because there are no balance sheet assets or liabilities associated with those contracts.

Financial options are agreements that give one party the right, but not the obligation, to buy or sell a specific amount of an asset for a specified price, called the strike price, on or before a specified expiration date. As writers of financial options, TRS and SURS receive a premium at the outset of the agreement and bear the risk of an unfavorable change in the price of the financial instrument underlying the option. Premiums received are recorded as a liability when the financial option is written. Fluctuations in the fair value of financial options are recognized in the financial statements as incurred rather than at the time the options are exercised or when they expire. As a purchaser of financial options, SURS pays a premium at the outset of the agreement and the counterparty bears the risk of an unfavorable change in the price of the financial instrument underlying the option. Premiums paid are recorded as an asset when the financial option is purchased and gains/losses are recognized when the options are exercised by the agency or they expire.

As of June 30, 2002, TRS's fair value (expressed in thousands) of option contracts written was (\$665). The fair value of option contracts written represents the amount to be paid to close all positions as of that date.

The preceding table represents the derivative positions held by TRS, ISBI and SURS at June 30, 2002 in financial futures and financial options. Additional information concerning the derivative investments of TRS, ISBI and SURS can be obtained from their separately issued annual reports.

Contractual principal amounts are often used to express the volume of these transactions but do not reflect the extent to which positions may offset one another. These amounts do not represent the much smaller amounts potentially subject to risk.

Deposits -

Primary Government

As of June 30, 2002, the carrying amount (amounts expressed in thousands) of cash deposits for the primary government was \$1,560,046 and the bank balance was \$1,999,591. Of the bank balance, \$1,992,155 was covered by federal depository insurance or by collateral held by the

State or the State's agent in the State's name, \$2,706 was covered by collateral held in the pledging bank's trust department or by its agent in the State's name, and \$4,730 was uninsured and uncollateralized.

Component Units

As of June 30, 2002, the carrying amount (amounts expressed in thousands) of the State's component units' cash deposits was \$591,179 and the bank balance was \$644,979. Of the bank balance, \$604,464 was covered by federal depository insurance or by collateral held by the State or the State's agent in the State's name, \$11,746 was covered by collateral held in the pledging bank's trust department or by its agent in the State's name, and \$28,769 was uninsured and uncollateralized. By statute, public monies deposited in financial institutions must either be collateralized; insured by an agency of the federal government; or not exceed 75% of the capital stock and surplus, 75% of the net worth, or 50% of the unimpaired capital and surplus of a financial institution.

Investments -

Investments are categorized below to give an indication of the level of custodial credit risk assumed by the State at June 30, 2002. Category 1 includes investments that are insured or registered or for which the securities are held by the State or its agent in the State's name. Category 2 includes uninsured and unregistered investments for which the securities are held by the counterparty trust department or agent in the State's name. Category 3 includes uninsured and unregistered investments (whether or not held in the State's name) and securities held by any other party (State's agent, counterparty's trust department or agent) but not in the State's name.

Additionally, the State had \$1.1 billion in investments with the U.S. Treasury for the payment of unemployment claims which are not subject to categorization.

The master repurchase agreements utilized by the Treasurer require the broker or financial institution to maintain the fair value of collateral securities at 102% of the agreement. The carrying amount (amounts expressed in thousands), including accrued interest, was approximately \$1,666,425 and the fair value of the collateral securities to be resold based on commitments under the repurchase agreements was approximately \$1,719,676 as of June 30, 2002.

Securities Lending Transactions -

The investment policies of certain State agencies, principally the retirement systems and certain universities, permit them to enter into securities lending transactions. In these transactions, the agency loans their securities to broker-dealers and other entities for collateral with a simultaneous agreement to return the collateral for the same securities in the future. agencies' securities custodians are agents in lending the securities for collateral of at least 102% of the fair value of the securities. Collateral can consist of cash, cash equivalents, government securities, commercial paper or irrevocable letters of credit. Depending on their nature, securities on loan at year-end are presented as classified or unclassified in the preceding schedule of custodial credit risk. Generally, at year-end, agencies had no credit risk exposure to borrowers because the amounts they owed to borrowers exceeded the amounts borrowers owed the agencies and maturities on non-cash collateral received are longer than the lesser of the maturities of the securities lent or the term of the lending transactions. Policies regarding indemnification vary among agencies. Some agencies' contracts with custodians require them to indemnify the agency if the borrowers fail to return the securities (and if the collateral is inadequate to replace the securities lent) or the borrowers fail to pay the agency for income distributions by the securities' issuers while the securities are out on loan. Other agencies have no provisions for indemnification.

Generally, securities loans can be terminated on demand by either the agency or the borrower, although the average term of the loans is 10 to 29 days. Cash collateral is invested in the lending agent's short-term investment pool, which at year-end has a weighted average maturity of 30 to 51 days. The relationship between the maturities of the investment pool and the agency's loans are affected by the maturities of the securities loans made by other entities that use the agent's pool, which the agency cannot determine. The agencies cannot pledge or sell collateral securities received unless the borrower defaults.

As of June 30, 2002, agencies had outstanding loaned investment securities (amounts expressed in thousands) having a fair value of \$4,026,745 against which they had received collateral having a fair value of \$4,170,018.

Reconciliation to Statement of Net Assets and Statement of Fiduciary Net Assets -

The Statement of Net Assets and Statement of Fiduciary Net Assets account cash and cash equivalents contains certain short-term investments (included as investments above) to reflect their liquidity. In addition, the disclosures related to deposits and investments above include certain items that the Statement of Net Assets and the Statement of Fiduciary Net Assets show as restricted assets or other assets. A reconciliation follows:

Water Revolving Fund				29,000						29,000
Non-major Enterprise Funds	2,000									2,000
Internal Service Funds				1,331						1,331
	\$1,978,366	\$ 215,204	\$ 605,963	\$ 2,000,124	\$ 11,454	\$ 521	\$ 556	\$ 552,676	\$ 3	\$ 5,364,867

Transfers are used to (1) move revenues from the fund that statute or budget requires to collect them to the fund that statute or budget requires to expend them, (2) move receipts to debt service funds as debt service payments become due, and (3) use unrestricted revenues collected in the general fund to finance various programs accounted for in other funds in accordance with budgetary authorizations.

In the year ended June 30, 2002, the State made a one-time transfer of \$225 million from the Tobacco Settlement Fund, a non-major governmental fund, to the Budget Stabilization Account of the General Fund.

LOANS AND NOTES RECEIVABLE

Loans and notes receivable at June 30, 2002, consisted of the following:

A portion of the General fund type business loan programs (\$29.4 million) represents various funds' pooled resources that the State has invested in a pilot mortgage program since fiscal year 1983. The only remaining program is categorized as a hotel loan and is discussed below.

Effective January 12, 1987, two of the program's outstanding mortgage loans aggregating \$28.9 million were restructured. One of these loans with an original balance of \$15.5 million was restructured again effective January 1, 1990. The remaining loan totaling \$13.4 million in original value was restructured effective January 1, 1991. Through June 30, 1998, the Treasurer recorded a provision for the write-down of \$17.1 million for these two properties based on independent valuations. These two loans have been classified as non-performing assets.

In 1995, the Treasurer authorized the trustee to sell the mortgage loans. However, the Attorney General opined that both his and the Governor's

consent were required which was not provided. Affiliates of the owners of the hotel loans filed a lawsuit against the trustee and the Treasurer seeking specific performance of the buy-sell agreement on the agreed-to terms.

On October 31, 1997, the trustee filed suit against the Hotel ventures for making improper deductions in determining payments due, creating a default and making the loan balances due upon demand. At the time of the filing of the suit, the trustee presented letters of credit with a value of \$2.7 million, which serve as collateral for the loans of one of the properties, for collection. The ventures obtained a restraining order to prevent collection of the letters of credit. On March 13, 2000, the Circuit Court in Madison County entered a judgment order requiring the Trustee and Treasurer to sell the mortgage loans on the hotel properties to the plaintiffs. The court found that the plaintiffs were ready, willing and able to perform the buy-sell agreements at the time originally set for closing in 1995. The Trustee and the Treasurer are appealing the order.

Briefings on the appeal were completed in February 2001 with oral arguments to order. No ruling has yet been issued on the arguments.

The two lawsuits were filed in Cook County. The affiliates of the owners of the hotel loans asked the Court to stay the lawsuits while the Madison County action was pending, and their motions were granted. After the final judgment was entered in the Madison County case, the Judge in the Cook County matter who is presiding over one of the lawsuits lifted his stay. Plaintiffs in the Madison County case then asked the Court to hold the trustee and its counsel in contempt for pursuing the Cook County case. Eventually, the trustee petitioned the Illinois Supreme Court for a supervisory order to allow it to proceed prosecuting the Cook County case without being held in contempt by the Madison County Court. The Supreme Court issued such a supervisory order in the fall of 2001, and the Cook County case is now proceeding. However, the other lawsuit remains stayed. As a result of discovery in the case which is proceeding, the trustee has determined that there have been additional events of default, and as a result, the trustee has now filed an amended complaint. The outcome of this litigation is not presently determinable.

The write-down of the above Hotel loans is not considered forgiveness of the obligations and collection efforts will continue for the entire loan balance including principal and interest.

CAPITAL ASSETS

Capital asset activity for the year ended June 30, 2002 was as follows:

Table 7-1 (amounts expressed in thousands)

The amounts liquidated in subsequent years for certain liabilities for governmental activities of the primary government will be as follows:

Compensated absences, certificates of participation and capital lease obligations (including installment purchases) — by the applicable governmental and internal service funds that account for the salaries and wages of the related employees or incurred the obligation.

Workers compensation – by the General Revenue Fund, the Road Fund or the Mental Health Fund (non-major governmental fund) based on the function of the related employees.

Net pension obligation – by the applicable charges to funds that account for the salaries and wages of the related employees who are members of the General Assembly Retirement System, the Judges' Retirement System or the State Employees' Retirement System. In addition, appropriations in subsequent years from the General Revenue Fund will liquidate amounts for employees who are members of the Teacher's Retirement System or the State Universities Retirement System.

Other – by the applicable governmental funds that incurred the obligation as discussed in Note 13.

GENERAL OBLIGATION BONDS

General obligation bonds have been authorized and issued primarily to provide funds for acquisition and construction of capital facilities for higher education, public and mental health, correction and conservation purposes and for maintenance and construction of highway and waterway facilities. Bonds also have been issued to provide assistance to municipalities for construction of sewage treatment facilities, port districts, aquarium facilities, local schools, mass transportation and aviation purposes, and to fund research and development of coal as an energy source. In addition, bonds have been authorized to refund any general obligation bonds outstanding.

The State Constitution provides that the State may issue general obligation bonds for specific purposes in such amounts as provided either by the General Assembly with a three-fifths vote of each house or by a majority of voters in a general election. The enabling acts pursuant to which the bonds are issued provide that all bonds issued thereunder shall be direct obligations of the State of Illinois and pledge the full faith and credit of the State. General obligation bonds are redeemed over a period not to exceed 30 years from available resources in the debt service funds. However, the State of Illinois has generally issued 25 year serial bonds with equal amounts of principal and interest maturing each year, except for capital appreciation and refunding bonds which mature in varying amounts. With the

exception of anti-pollution bonds, Illinois offerings generally have a call option of the State. Calls can begin 10 years following the date of issuance, in whole or in part, in such order as the State shall determine and at a redemption price not to exceed 102% of par value.

On June 28, 2002, the General Assembly amended the General Obligation Bond Act (30 ILCS 330 et seq.) to increase the authorized bond limits by purpose to (in thousands): Capital Development—\$7,320,236; Transportation—\$5,313,399; Anti-Pollution—\$461,315; School Construction—\$3,150,000; Coal Development—\$663,200; Tobacco Securitization—\$750,000; and Refunding—\$2,839,025.

Included in this amended act was the authorization to issue up to \$750 million of "tobacco securitization general obligation bonds" for general operating purposes in fiscal year 2003 only, with 50% of the proceeds to be deposited into the General Revenue Fund and 50% into the Budget Stabilization Fund. Annual transfers would be required from the State's Tobacco Settlement Recovery Fund as a supplemental source of repayment. As of June 30, 2002, none of these bonds have been issued.

General obligation bonds outstanding and bonds authorized but unissued at June 30, 2002 are as follows:

SPECIAL OBLIGATION BONDS

Special obligation bonds have been authorized and issued to provide funds for the Build Illinois Program and the State's Metropolitan Civic Center Support Program, and to refund any bonds previously issued under these programs.

The Build Illinois Program was implemented to expand the State's efforts in economic development by providing financing in certain areas. These areas include construction, reconstruction, modernization and extension of the State's infrastructure; development and improvement of educational, scientific, technical and vocational programs and facilities; expansion of health and human services in the State; protection, preservation, restoration and conservation of the State's environmental and natural resources; and provision of incentives for the location and expansion of businesses in Illinois resulting in increased employment.

The State's Metropolitan Civic Center Support Program was implemented to provide funding for single or multi-purpose projects. The primary function of which is to provide public entertainment, exhibitions or conventions, or to provide parking facilities related thereto. Also, a portion (not to exceed \$10 million) is authorized for the purpose of making construction and improvement grants by the Secretary of State, as State Librarian, to public libraries and library systems.

Special obligation bonds are payable primarily from dedicated portions of the State's sales tax and the horse racing privilege tax and are redeemed over a period of not more than 30 years. Additionally, these bonds have call provisions providing for early redemption at the option of the State, beginning 10 years following the date of issuance, in whole or in part, in such order as the State shall determine and within any maturity by lot at varying premiums which decrease periodically.

Special obligation bonds outstanding and bonds authorized but unissued for governmental activities at June 30, 2002, are as follows:

REVENUE BONDS

The State Constitution empowers certain State agencies and authorities to issue bonds that are not supported by the full faith and credit of the State. The bond indentures include a pledge from these agencies and authorities that income derived from acquired or constructed assets be used to retire the debt and service related interest.

Bonds outstanding at June 30, 2002 (except for the Illinois State Toll Highway Authority which is as of December 31, 2001), net of unamortized discounts, unamortized deferred amount on bond refundings and unamortized bond premiums are as follows:

Table 11-1 (amounts expressed in thousands)

Included within the \$89.9 million of outstanding Illinois Rural Bond Bank revenue bonds are \$19.2 million of bonds which do not require the Governor to include in the State budget the amount necessary for payment of principal and interest. Payment of principal and interest on these bonds is guaranteed by a municipal bond insurance policy.

Demand and Variable Rate Bonds

Illinois Student Assistance Commission (Commission)

Included in the \$2,500.8 million of outstanding revenue bonds issued by the Illinois Student Assistance Commission are \$436.1 million of variable rate demand bonds, (Series B, Series C, Series D, Series 1996A, Series 1996B, Series

1997A, Series 1997B, Series 1998A, Series 1998B, Series 1999A and Series 1999B), the proceeds of which were used to purchase and originate student loans. The bonds mature at various dates, bearing interest rates as determined by the remarketing agent that would enable the bonds to be sold at a price equal to their principal amount, but not to exceed 18% per annum for the Series B and Series C bonds, 15% per annum for the Series D, Series 1996B, Series 1997B, and Series 1998B bonds and 12% per annum for the Series 1996A, Series 1997A, Series 1998A, Series 1999A and Series 1999B bonds.

The bonds, if in a weekly or monthly mode, are subject to purchase on demand of the holder at a price equal to principal plus accrued interest on seven days' notice and delivery to the remarketing agent. The remarketing agent is

authorized to sell the repurchased bonds at a price equal to their principal amount by adjusting the interest rate.

Irrevocable letters of credit have been issued by various credit facilities in order to permit the Trustee to draw amounts to pay the tender price of the variable rate demand bonds tendered for payment under early redemption and demand provisions of the bond issues. Under these letters of credit, the various credit facilities, acting as tender agent, paying agent, and bond registrar for the respective bond issues, are entitled to draw the amount needed (a) to pay interest on the bonds on each interest payment date; (b) to pay principal and interest on the bonds called for redemption; (c) to pay principal and interest on the bonds resulting from an acceleration of maturity due to an event of default; and (d) to pay the tender price of bonds tendered or required to be tendered for purchase which is not to be paid from remarketing proceeds or from certain funds held under the indenture. The letters of credit have variable interest rates ranging from the Federal funds rate plus .5% to 20% per annum and expire at various dates through August 28, 2004. If the remarketing agent is unable to resell any bonds that are "put" within 180 days of the "put" date, the Commission is required to repay the amounts drawn on the letters of credit for the redemption of these bonds. Repayment of amounts drawn on the letters of credit will be made by the Commission from the trustee accounts.

The Commission is required to pay to the credit facilities an origination fee based on the line of credit amounts and a quarterly commitment fee thereafter, based on the available amount of the letters of credit. Quarterly commitment fees currently in effect range from .275% to .55% of the available amount of the letters of credit.

Also included in the \$2,500.8 million of outstanding revenue bonds are \$1,819.9 million of variable rate bonds. These bonds carry a maximum interest rate ranging from 16% to 17%. The interest rate in effect at June 30, 2002 was used in calculating future interest payments.

Illinois Housing Development Authority (IHDA)

Included within the IHDA's outstanding revenue bonds are \$8.1 million of Multi-Family Variable Rate Demand Bonds Series 1996A and \$57.4 million of Multi-Family Housing Revenue Bonds Series 1997 and Series 2000A, which are variable rate demand bonds. Interest rates on these bonds are determined weekly at a rate established by the remarketing agents on each rate determination date. The IHDA has agreements with liquidity providers to purchase any bonds tendered for purchase in accordance with the indentures with respect to which the Trustee does not, on the date any such tendered bonds are required to be purchased, have sufficient funds to make such Payment of the principal of and purchase. interest on the bonds when due are insured by a financial guarantee insurance policy. The IHDA has a general obligation to reimburse the insurer for any such payments made.

Illinois State Toll Highway Authority (THA)

Included within the THA's outstanding revenue bonds are variable rate demand bonds in the amount of \$178.2 million for the Series 1993B bonds and \$123.1 million for the Series 1998B bonds. These bonds mature in 2010 and 2017, respectively, and bear interest rates as determined by the remarketing agents on each rate determination date not to exceed 22% and 25%, respectively. These bonds are subject to redemption if tendered by the holder at a price equal to the principal plus accrued interest upon notice and delivery to the remarketing agent. The THA has agreements with liquidity providers to purchase any bonds so tendered for purchase in accordance with the indentures with respect to which the Trustee does not, on the date any such tendered bonds are required to be purchased, have sufficient funds to make such purchase. The THA has obtained a financial guarantee insurance policy to guarantee the payment of principal and interest on the scheduled maturity dates. The THA has an obligation to reimburse the insurer for any such payments made.

To mitigate the effect of interest rate changes, the THA has entered into Interest Rate Swap Agreements for both the Series 1993B bonds and the Series 1998B bonds. These agreements effectively change the THA's interest rates to a synthetic fixed rate of 4.92% and 4.325%, respectively. The THA will be exposed to variable rates if a counter party to the swap agreement defaults or if the swap is terminated. However, the THA does not anticipate nonperformance. The amounts shown in the schedule of revenue bond debt service requirements are based on the fixed rate effects of this interest rate swap.

Conduit Debt (not included in financial statements)

The State of Illinois, by action of the General Assembly, created various authorities for the

express purpose of providing private entities with an available low cost source of capital financing for construction of facilities deemed to be in the public interest. Fees are assessed to recover related processing and application costs incurred. Bonds issued by the authorities represent limited obligations payable solely from payments made by the borrowing entities. The majority of the bonds are secured by the property financed. Upon repayment of a bond, ownership of acquired property transfers to the entity served by the bond issuance. The State has no obligation for this debt. Accordingly, these bonds are not reflected in the accompanying financial statements. At June 30, 2002, recorded amounts of revenue bonds, net of defeased bonds and notes outstanding as reported by authority officials are as follows (confirmations were not received from authorities noted with a '*' in the following table):

Table 11-3 (amounts expressed in thousands)

Other Obligations	(H)	18.1	9.8		228.3

(A) Lease Commitments –

The State has entered into various capital and operating leases for land, office facilities, office and computer equipment and other assets. Although lease terms vary, certain leases are renewable subject to appropriation by the General Assembly. If renewal is reasonably assured, leases requiring appropriation by the General

Assembly are considered noncancelable leases for financial reporting purposes. Any operating leases with scheduled rent increases are considered immaterial to the future minimum lease payments and current rental expenditures.

At June 30, 2002, assets capitalized under capitalized leases are as follows:

Table 13-2 (amounts expressed in tho	usands)			
	Pr	imary Governme	nt	
	Governmental Activities	Business-type Activities	Fiduciary Funds	Component Units

Rental payments (amounts expressed in thousands) for operating leases charged to operations during the year ended June 30, 2002

aggregated \$334,363 for the primary government and \$24,718 for component units.

(B) Certificates of Participation -

State-issued Certificates of Participation. The State is authorized to issue certificates of participation ("Certificates") representing the right to receive a proportionate share in leasepurchase or installment purchase payments to be made for the benefit of State agencies for the acquisition or improvement of real or personal property, refinancing of such property, payment of expenses of such property or payment of expenses related to the issuance. outstanding balance of the State-issued Certificates included in the governmental activities financial statements as of June 30, 2002 was \$33.4 million.

Certain universities have also issued Certificates representing the right to receive a proportionate share of lease-purchase or installment payments. All of these Certificates issued by component units are considered state-issued. The outstanding balance of these Certificates as of June 30, 2002 was \$395.7 million, which

includes unamortized premiums of \$8.4 million for the university funds, and is included in the component unit financial statements.

Non-State-issued Certificates of Participation.

The State also finances the purchase of certain state-owned real and personal property through third party (non-State-issued) certificates. These non-State-issued Certificates are sold by private concerns and are repaid by State agency appropriations pursuant to installment purchase agreements. The outstanding balance of non-State-issued Certificates included in the governmental activities financial statements as of June 30, 2002 was \$104.7 million.

Future commitments by the State to make installment payments to pay for the assets acquired and related financing costs for State-issued and non-State-issued Certificates at June 30, 2002 are as follows:

,		C	ertificates of	Participation	on		•

(C) Department of Nuclear Safety -

Tracts of land near Ottawa, Illinois were donated to the State more than 50 years ago for public purposes. Several years later, the State discovered that other parties had dumped radioactive waste on the land, before it was donated to the State. The State advised the United States Environmental Protection Agency (USEPA) of the situation and the land was transferred to the Department of Nuclear Safety for clean-up.

Although the State was not culpable for the creation of the hazard, federal law makes it, as the owner, a potentially responsible party along with the corporations that did the dumping. These corporations are defunct and in

recognition of the State's lack of culpability, the USEPA has recommended that the State pay 50% of the estimated \$35 million clean-up plan. The State has recorded a liability for the clean-up in the governmental activities financial statements in the amount of \$17.5 million at June 30, 2002.

(D) Installment Purchase Obligations -

The State has acquired certain land, office facilities, office and computer equipment and other assets through installment purchase arrangements. Future commitments under installment purchase contracts as of June 30, 2002 are as follows:

			Pri	mary (Soverni	nent				Component Units

(E) Cape Girardeau Bridge—State of Illinois/ State of Missouri Joint Agreement -

The State of Illinois entered into an agreement with the State of Missouri for the construction of the Cape Girardeau Bridge. The agreement required that the State of Illinois reimburse the State of Missouri for 40% of the costs incurred for bridge construction. In accordance with a pre-established payment plan, the State of Illinois repays one-quarter of its annual obligation each year for four years following the year costs were incurred. Each year, the State of Missouri incurs costs and each year, the State of Illinois makes payments on costs incurred in prior years (unless

such costs have been totally reimbursed) subject to the same one-quarter reimbursement arrangement. The State of Missouri assesses 5.3% interest on the unpaid balance.

As of June 30, 2002, the balance of the Illinois/ Missouri Joint Agreement was \$18.3 million and is included in the governmental activities financial statements. In subsequent years, this liability will be liquidated from future resources of the State Construction Account Fund, a major governmental fund. Future Illinois/Missouri Joint Agreement debt service requirements at June 30, 2002, are as follows:

Table 13-7 (amo	ounts ex	pres	sed in th	ous	ands)

2006		1,770		94		1,864
	\$	18,254	\$	1,890	\$	20,144

(F) Obligations to Lottery Prize Winners -

The State has obligations to certain lottery prize winners for awards payable in annual installments ranging from nineteen years to the life of the prize winner, with the first payment being made after the claim is presented for payment. In addition, the State has fulfilled its obligations for certain other prize winners through the purchase of annuities under group contracts.

Prior to July 1985, the State purchased annuity contracts in the name of the prize winner through agreements with insurance companies which provide payments corresponding to the Lottery's obligation to the prize winner. The State would be contingently liable for such future payments if the insurance company defaulted on their payment obligation.

As the State has met its primary obligation for these future payments, the liability and corresponding value of the annuity contracts are not included in these financial statements. The present value of future installment payments owed to these prize winners approximates \$12.0 million at June 30, 2002.

For certain prize winners, annuities were purchased in the name of the State for which the State has retained the rights of ownership. Effective July 30, 1985, State law provides that the State Treasurer, with the consent of the Director of the Lottery, may contract to invest in securities, which provide payments corresponding to the Lottery's obligation to these winners. The present value of these annuities and the related liabilities owed to prize winners,

approximating \$34.2 million, have been reported in the financial statements of the State Lottery Fund, a non-major enterprise fund.

In addition to the prize obligations discussed above, the State has provided for other payments corresponding to the Lottery's obligation to prize winners through the purchase of direct obligations of the federal government, primarily in the form of United States Treasury zero coupon bonds. As established by State law, such securities shall be maintained in the Deferred Lottery Prize Winners Trust Fund, a special trust fund separate and apart from all public money or funds of the State. These investments are purchased in amounts to provide for annual annuity payments to the prize winner(s) of each qualifying individual drawing. Since these monies are invested by the State on behalf of external legally separate entities (the prize winners), with specific investments being acquired for these individual entities for which the income from and changes in the value of the investments affect only the prize winners for whom they were acquired, in accordance with the provisions of GASB Statement No. 31, Accounting and Financial Reporting for Certain Investments and for External Investment Pools, the Deferred Lottery Prize Winners Trust Fund is reported as an investment trust fund. The investments of the fund are reported at fair value, which approximated \$1.21 billion at year-end and the fund balance is reported as reserved for external investment pool participants.

(G) Illinois Student Assistance Commission -

Tuition payable in the Illinois Prepaid Tuition Fund, a non-major enterprise fund, as of June 30, 2002, represents net principal payments received for contracts held by the fund in the amount of \$236.6 million, of which \$5.2 million is considered current. In addition, an accretion payable recorded in the same fund in the amount of \$27.8 million of which \$.4 million is considered current, is the present value of payments to be made in excess of the principal payments received from investments of the tuition contracts. The accretion expense is estimated as a percentage of net tuition costs paid

to date. The rate for fiscal year 2002 is 7% based on the actuarial reporting. The accretion expense is calculated on a monthly basis on the balance in the tuition payable account.

(H) Other Obligations -

Primary Government - Governmental Activities

The Tax Reform Act of 1986 requires issuers of state and local government bonds to rebate to the federal government arbitrage profits earned on those bonds under certain circumstances. In accordance with that, there was an arbitrage rebate liability of \$515 thousand as of June 30, 2002. The General Obligation Bond Retirement and Interest Fund and the Build Illinois Bond Retirement and Interest Fund, non-major governmental funds, are expected to be used to repay \$445 thousand and \$70 thousand, respectively, of the liability from future resources of those funds.

A lawsuit against the City of Chicago and the Illinois State Board of Education (ISBE) has resulted in a settlement requiring the ISBE to pay \$19.25 million over seven years to Chicago Public School District #299 (District) to assist the District in providing special education services to identified eligible children within the least restrictive environment. The settlement, reached in June, 1999, requires the ISBE to pay \$2.75 million per year through January, 2006. Payments to the District ceased in March 2000, when the District failed to disburse an adequate amount of the ISBE's portion of the settlement for the intended purpose. This resulted in the District returning \$1.3 million to ISBE. Payments to the District resumed in January 2002. As of June 30, 2002, ISBE has paid \$1.6 million to the District. The current year portion of the obligation is accounted for in ISBE Federal Department of Education Fund, a non-major governmental fund. As of June 30, 2002, the current year portion of the obligation is \$6.6 million, which includes \$1.1 million of the fiscal year 2000 obligation and \$5.5 million for the full fiscal years 2001 and 2002 obligation. The long term portion of the obligation at June 30, 2002 was \$11.0 million and is accounted for in the governmental activities financial statements.

Primary Government - Business-type Activities

The Self Insurers' Security Fund, a non-major enterprise fund, has recorded a liability of \$9.8 million for unpaid claims. This amount is the estimated future benefit payments for bankrupt companies. This liability is expected to be paid with current resources of the fund.

Component Units

The Illinois Housing Development Authority (IHDA) has loans throughout the State. Loans receivable in the Mortgage Loan Programs and the Affordable Housing Programs are secured by first mortgage liens on the related developments. Each development is subject to a regulatory agreement under which the IHDA has certain powers relating to rents, profits, occupancy, management and operations. Monies are required to be deposited in reserve accounts monthly by all mortgagors for real estate tax reserves and by substantially all mortgagors for insurance and replacement reserves.

The deposits from developers, which are held in escrow, may be used when necessary to pay principal and interest payments and fund construction cost overruns, change orders, tax insurance payments and capital In addition, on certain improvements. developments, letters of credit and assignments of syndication proceeds are held by the IHDA for similar purposes and to fund potential operating deficits of the related developments. Investment income earned on deposited funds is credited to the respective developer's escrow accounts. As of June 30, 2002, the deposits in escrow were \$142.0 million.

In addition, component units presented other miscellaneous obligations in the amount of \$86.3 million. These obligations will be liquidated by the reporting component unit.

REFUNDINGS OF LONG-TERM OBLIGATIONS

(A) Advance Refundings

During the year ended June 30, 2002, the State issued advanced refunding bonds to lower interest rates or to restructure debt service requirements for cash management purposes. General obligation, special obligation and revenue bonds were issued to refund portions of earlier issues. The principal of the refunded bonds will be redeemed on various dates through 2010 at redemption prices ranging from 100% to

102%. Proceeds from the sales were placed in irrevocable trusts that are used to service the future debt requirements of the old debt. As a result, the refunded bonds are considered to be defeased and the liability for those bonds has been removed from the financial statements of the State. At June 30, 2002, the outstanding balance of the defeased bonds was \$547.3 million. Advance refunding bonds issued during fiscal year 2002 were as follows:

	Par Value of Refunding Issue		of Refundin		Refunding Issue Interest Rates	Par Value of Bonds <u>Refunded</u>		Interest Rates of Bonds Refunded	Debt Service Reduced by Refunding		Ecc	unding onomic n/(Loss)	Accountin		
Primary Government

(B) Current Refundings

During the year ended June 30, 2002, the State issued current refunding bonds to lower interest rates, to restructure debt service requirements for cash management purposes or to extend its tax advantaged debt maturities, which assists the State in providing low cost borrower benefits to

its borrowers. These general obligation, special obligation and revenue bonds were issued to currently refund portions of earlier issues maturing on dates ranging from March 1, 2002 through June 1, 2002 at redemption prices ranging from 100% to 102%. Current refunding bonds issued during fiscal year 2002 were as follows:

	Par Value of Refunding Issue		Refunding Issue Interest Rates	of	Par /alue Bonds funded	Interest Rates of Bonds Refunded	Se Re-	Debt ervice duced/ reased) by unding	Ecc	unding onomic n/(Loss)	Accounting Gain/(Loss)

(C) Prior Year Refundings

In prior years, the State defeased certain callable maturities of general obligation, special obligation and revenue bonds by placing the proceeds of new bonds in an irrevocable trust to provide for all future debt service payments on the old bonds. Accordingly, the trust account assets and the liability for the defeased bonds are not included in the State's financial statements. At June 30, 2002, the outstanding balances of prior year defeased bonds were as follows:

Table 14-3 (amounts expr	esse	d in thousand	ds)

	\$	232,132	\$		\$	610,428

RETIREMENT SYSTEMS

Plan Descriptions. The State of Illinois sponsors five public employee retirement systems ("PERS") that are included in the State's financial statements as pension trust funds. The General Assembly Retirement System ("GARS"), Judges' Retirement System ("JRS") and State Employees' Retirement System ("SERS"), are the administrators of single-employer defined benefit pension plans. The GARS, JRS and SERS are governed by articles 2, 18 and 14, respectively, of the Illinois Pension Code (40 ILCS 5/1, et. al.).

The Teachers' Retirement System ("TRS") is the administrator of a cost-sharing multiple-employer public employee defined benefit pension plan with "special funding situations." It provides coverage to teachers employed by public school districts in Illinois (excluding Chicago) even though most covered employees are not State employees. There are 890 local school districts, 140 special districts and 27 other State agencies that contribute to the TRS plan. At June 30, 2002, the TRS had outstanding receivables of \$111 million for payroll deduction agreements with members for optional services, refund repayments and upgrade balances owed to the TRS.

The State Universities Retirement System ("SURS") is the administrator of a cost-sharing multiple-employer public employee defined benefit pension plan and a defined contribution plan. They also have "special funding situations." The SURS provides coverage to faculty and staff of State universities, community colleges and related agencies, of which, some covered employees are not State employees. There are 12 universities, 39 community colleges and 14 other State agencies that contribute to the SURS plan.

The State of Illinois is legally mandated to make contributions to the TRS and SURS. Because the State contributes most of the TRS and SURS employer contributions, the single employer provisions of GASB Statement 27 have been

followed for reporting those systems in the statewide CAFR. The TRS and SURS are governed by articles 16 and 15, respectively, of the Illinois Pension Code.

Effective January 1, 1998, legislation established an alternative defined benefit program known as the Portable Benefit Option Plan within the SURS. This option is offered in addition to the existing traditional benefit option. All members who are eligible for the traditional benefit option are eligible for the portable option. New and existing members are provided a window period in which to make an irrevocable election. The portable option provides an enhanced refund at termination for those who leave SURS with at least five years of service. Offsetting this additional cost is the elimination of the survivor benefit package. This program is designed to be cost-neutral in relation to the traditional option. Approximately 15,300 of the approximately 79,100 members have chosen this option.

Legislation, effective January 1, 1998, also required the SURS to offer a Self-Managed Plan. This is a defined contribution plan and is offered to employees of all SURS employers who elect to participate. All but two SURS employers participate in the Self-Managed Plan. The contribution rate is 8% of their gross earnings. It is a qualified money purchase plan under Section 401(a) of the Internal Revenue Code. The assets are maintained under a trust administered by the SURS Board of Trustees in accordance with the Illinois Pension Code. 6.384 of the approximately 79,100 members have chosen this option. \$134.8 million of the \$9.9 billion total assets relate to the Self-Managed Plan. Plan member contributions were \$27.5 million and employer contributions were \$23.0 million for the year ended June 30, 2002.

Each of the five State-sponsored retirement systems provide retirement, death and disability benefits to members and beneficiaries. Each plan also issues a publicly available financial report that includes financial statements and required supplementary information for that plan. Those reports may be obtained by writing or calling the plan as follows:

- General Assembly Retirement System and Judges' Retirement System, 2101 South Veterans Parkway, PO Box 19255, Springfield, Illinois, 62794-9255, (217)782-8500.
- State Employees' Retirement System, 2101 South Veterans Parkway, PO Box 19255, Springfield, Illinois, 62794-9255, (217)785-2340.
- Teachers' Retirement System, 2815 West Washington Street, PO Box 19253, Springfield, Illinois, 62794-9253, (217)753-0311.
- State Universities Retirement System, 1901 Fox Drive, Champaign, Illinois, 61820-7333, (217)378-8800.

Funding Policy and Annual Pension Cost. Member contributions are based on fixed percentages set by statute ranging from 4.0% to 11.5%. The State's funding requirements have been established by statute (Public Act 88-593) effective July 1, 1995 and provide for a systematic 50-year funding plan with an ultimate goal to achieve "90% funding" of the systems' liabilities. In addition, the funding plan provides for a 15-year phase-in period to allow the State to adapt to the increased financial commitment.

Once the 15-year phase-in period is complete, the State's contribution will then remain at a level percentage of payroll for the next 35 years until the 90% funded level is achieved. As illustrated in Table 15-1, the State met its funding requirement established by statutory law for the fiscal year ended June 30, 2002. contributions varied slightly from contributions required by statute mainly because of differences between estimated and actual federal contributions. In addition for TRS, the annual contribution required per statute is the State funding requirement certified before Public Act 92-505 was enacted. This act allowed school districts to reduce their contributions to TRS by the amount they contribute to the Teachers' Health Insurance Security Fund. The act is effective January 1, 2002 through June 30, 2003. Accordingly, although employer contributions are less than the amount listed as statutorily required, TRS met its funding requirement.

The current statutory law includes a "continuing appropriation," which means that the State must automatically provide funding to the pension systems based on actuarial cost requirements and amortization of the unfunded liability without being subject to the General Assembly's appropriation process.

This statutory funding requirement differs significantly from the annual pension cost ("APC") because the statutory plan does not conform with the GASB Statement 27 accounting parameters. The State's APC for the current year and related information for each plan are included in Table 15-1.

	(GARS		JRS		SERS		TRS		SURS

^{**} Composite, approximately 6.5%

POST-EMPLOYMENT BENEFITS

The State provides health, dental and life insurance benefits for certain retirees and their dependents. Substantially all State employees become eligible for post-employment benefits if they eventually become annuitants of one of the State sponsored pension plans. Health and dental benefits include basic benefits for annuitants under the State's self-insurance plan and insurance contracts currently in force. insurance benefits are limited to \$5,000 per annuitant age 60 and older. For fiscal year 2002, the State did not segregate payments made to retirees from those made to current employees for health and dental, and life insurance benefits. The total cost of all members, including postemployment health and dental, and life insurance benefits, is recognized as an expenditure in the accompanying financial statements as claims are reported and are financed on a pay-as-you-go basis. For fiscal year 2002, the cost of providing post-employment health and dental benefits and life insurance benefits for the approximately 82,600 retirees was estimated to be \$321.3 million and \$11.2 million, respectively.

The State also provides health insurance benefits to non-State employees who are annuitants of the Teachers' Retirement System (TRS). Funding is provided by a one-half of one percent contribution from active teachers and matching appropriations from the State to pay the subsidy portion of participating annuitants. enrolling in TRS managed care or residing in areas with no managed care receive a 75% premium subsidy. All others receive a 50% At June 30, 2002, there were subsidy. approximately 38,000 TRS annuitants enrolled in the health plan. Payments into this plan by the annuitants as well as the state subsidy were approximately \$89.0 million for the year ended June 30, 2002. The teachers' health insurance program is administered by the Illinois Department of Central Management Services (CMS) and is accounted for in the Teachers' Health Insurance Security Fund, a non-major enterprise fund. TRS is responsible for program enrollment and eligibility determination. CMS is responsible for providing information and consultation to plan participants.

17

FUND DEFICITS

Primary Government

Major Governmental Funds

The State's General Fund, from which a significant portion of day to day operating expenditures are paid, has a GAAP deficit aggregating \$3.306 billion at June 30, 2002, although the budgetary basis fund deficit at that date was \$1.220 billion. This deficit results from a substantial decrease in current year revenues due to the economy in addition to the recognition of fund liabilities significantly in excess of accrued revenues.

Nonmajor Governmental Funds

The DHS Special Purposes Trust Fund of the Department of Human Services has a deficit at

June 30, 2002 aggregating \$1.3 million, resulting from the recognition of fund liabilities in excess of accrued revenues on the modified accrual basis.

The Special Education Medicaid Matching Fund of the Department of Public Aid has a deficit at June 30, 2002, aggregating \$33.1 million, resulting from the recognition of fund liabilities in excess of accrued revenues on the modified accrual basis.

The County and Mass Transit District Fund of the Department of Revenue has a deficit at June 30, 2002, aggregating \$.4 million, resulting from the recognition of fund liabilities in excess of accrued revenues on the modified accrual basis.

The Local Government Tax Fund of the Department of Revenue has a deficit at June 30, 2002, aggregating \$3.5 million, resulting from the recognition of fund liabilities in excess of accrued revenues on the modified accrual basis.

The Personal Property Tax Replacement Fund of the Department of Revenue has a deficit at June 30, 2002, aggregating \$6.7 million, resulting from the recognition of fund liabilities in excess of accrued revenues on the modified accrual basis.

The Federal/Local Airport Fund of the Department of Transportation has a deficit at June 30, 2002, aggregating \$10.3 million, resulting from the recognition of fund liabilities in excess of accrued revenues on the modified accrual basis.

The Drivers Education Fund of the State Board of Education has a deficit at June 30, 2002, aggregating \$7.4 million, resulting from reimbursement to school districts for drivers education program costs incurred in the current year but not paid until the subsequent year.

The Federal Department of Agriculture Fund of the State Board of Education has a deficit at June 30, 2002, aggregating \$.6 million, resulting from program costs incurred in the current year but not paid until the subsequent year.

The Federal Department of Education Fund of the State Board of Education has a deficit at June 30, 2002, aggregating \$11.8 million, resulting from a liability recorded due to a lawsuit settlement during fiscal year 2002.

The Capital Development Fund of the Capital Development Board has a deficit at June 30, 2002 aggregating \$14.7 million, resulting from recognition of fund liabilities in excess of accrued revenues.

The School Construction Fund of the Capital Development Board has a deficit at June 30, 2002, aggregating \$9.9 million, resulting from recognition of fund liabilities in excess of accrued revenues.

The above Governmental Funds' deficits will be eliminated by future revenue increases and/or expenditure reductions in the following year(s).

Nonmajor Enterprise Funds

The Prepaid Tuition Fund of the Illinois Student Assistance Commission has a deficit at June 30, 2002, aggregating \$41.6 million, resulting from program costs incurred since the inception of the program which will be paid in subsequent years.

The Local Government Health Insurance Reserve Fund of the Department of Central Management Services has a deficit at June 30, 2002, aggregating \$14.3 million. Premium rates were increased by 15.8% for fiscal year 2002 and will continue to increase to meet program cost increases and to eventually eliminate the net asset deficit.

18

RISK MANAGEMENT

Primary Government:

The State is exposed to various risks of loss related to torts; theft of, damage to, and destruction of assets; errors and omissions; workers compensation and natural disasters. The State retains the risk of loss (i.e. self insured) for these risks except minimal commercial insurance. There were no significant reductions in insurance coverage from the prior fiscal year. The amount of settlements has not exceeded insurance coverage in the past three fiscal years.

Liabilities are reported when it is probable that a loss has occurred and the amount of that loss can be reasonably estimated. Liabilities include an amount for claims that have been incurred but not reported (IBNR). Claims liabilities are based upon the estimated ultimate cost of settling the claims including specific, incremental claim adjustment expenses, salvage, and subrogation and considering the effects of inflation and recent claim settlement trends including frequency and amount of payouts and other economic and social

factors. Liabilities for incurred losses to be settled by fixed or reasonably determinable payments over a long period of time are reported at their present value using an interest rate of 5.03% which is the average interest rate for fiscal year 2002 general obligation debt issues.

The State's risk financing of auto liability has been determined using an estimate of claims outstanding. The liability is expected to be paid from future resources of the General Fund and Road Fund in the amount of \$2.2 million and \$5.5 million, respectively.

The workers compensation liability has been determined using claims outstanding and a projection of claims to be submitted, based upon prior years experience of the State. Claims that will be liquidated with expendable available financial resources have been recorded as a liability in the General Fund, the Road Fund and the Mental Health Fund (a non-major governmental fund), in the amounts of \$4.5, \$2.2 and \$.1 million, respectively. The remaining portion of the liability, \$125.9 million as of June 30, 2002, is included in the government-wide financial statement. Of this liability, \$61.5, \$29.0 and \$35.4 million are expected to be paid from future resources of the General Fund, the Road Fund and the Mental Health Fund, respectively

The following is a reconciliation of the State's claims liabilities for the year ended June 30, 2002:

Table 19-1 (a	ole 19-1 (amounts expressed in thousands)							
Changes in Claims Liability Balances								
Year Ended	Beginning	Claims			Ending			
June 30	Balance	Incurred	De	creases	Balance			
2001	\$129,681	\$ 80,289	\$	70,018	\$139,952			
2002	\$139,952	\$ 67,704	\$	67,213	\$140,443			

The State administers the following public entity risk pools for non-state employers: 1) the Local Government Health Insurance Reserve Fund offers a health insurance program to local governments for its employees and retirees, 2) the Teacher Health Insurance Security Fund offers health insurance to school districts for its teachers and retirees and 3) the Community College Health Insurance Security Fund offers health insurance to community college retirees and their dependent beneficiaries. These funds are presented as non-major enterprise funds in the State's CAFR. Detailed information on these programs can be obtained from the Department of Central Management Services, Division of Risk Management, 604 Stratton Office Building, Springfield, Illinois, 62706, which administers the plans. The Financial audit report for the Department of Central Management Services includes fund financial statements and the required pool supplementary disclosures for these three plans.

Component Unit:

The University of Illinois, a component unit, records an accrued self-insurance liability which covers hospital patient liability; hospital and medical professional liability; estimated general and contract liability; and workers' compensation liability related to employees paid from local funds. The University's accrued self-insurance liability was \$81.3 million as of June 30, 2002. accrued self-insurance liability discounted at a rate of 6% at June 30, 2002. Amounts increasing the accrued self-insurance liability are charged as expenses based upon estimates made by actuaries and the University's risk management division. The workers' compensation self-insurance liability of \$7.1 million at June 30, 2002 related to employees who are paid from State appropriations is included in the University's accounts payable. These claims will be paid from State appropriations in the year in which the claims are finalized, rather than from unrestricted net assets at June 30, 2002.

Accrued self-insurance includes \$52.2 million at June 30, 2002 for the currently estimated ultimate cost of uninsured medical malpractice liabilities. Ultimate cost consists of amounts estimated by the University's risk management division and independent actuaries for asserted claims, unasserted claims arising from reported incidents, expected litigation expenses, and amounts determined by actuaries using relevant industry data and hospital specific data to cover projected losses for claims incurred but not reported. Because the amounts accrued are estimates, the aggregate claims actually incurred could differ significantly from the accrued self-insurance

liability at June 30, 2002. Changes in these estimates will be reflected in the Component Unit Statement of Revenues, Expenses and Changes in Net Assets in the period when additional information is available.

The University has contracted with several commercial carriers to provide varying levels and upper limits of excess indemnity coverage. These coverages have been considered in determining the required accrued self-insurance liability. There were no settlements which exceeded insurance coverage during the last three years.

19

COMMITMENTS AND CONTINGENCIES

(A) Construction Commitments

The Department of Transportation has outstanding construction commitments for highway improvement programs of \$1.094 billion as of June 30, 2002. These commitments will be financed through State reappropriations, with \$703 million available for federal reimbursement. Also, the Capital Development Board has outstanding construction commitments for building and building additions and improvements of \$201.2 million as of June 30, 2002, which will be financed through State reappropriations. The Illinois State Toll Highway Authority, reported on a December 31st year end. has entered into commitments for road construction of \$10.1 million as of December 31. 2001. Illinois State University, Northern Illinois University, Southern Illinois University, and the University of Illinois have outstanding construction commitments for various building and building improvement projects of \$.6, \$7.2, \$34.2 and \$136.4 million, respectively.

(B) Protested Taxes

Between 1993 through 1996, Consolidated cases were filed in the Circuit Court of Sangamon County challenging the constitutionality of Illinois' former Insurance premium tax and the applicability of the Illinois Retaliatory Tax Statute (215 ILCS 5/444 and 5/444.1). As there

is a reasonable possibility that the cases could be finally decided in favor of the plaintiffs, the State has treated the full amount in the protest account as a contingent claim of \$16.8 million.

(C) Federal Disallowance

In December 1994, the Centers for Medicare and Medicaid Services (CMS, formerly known as Health Care Financing Administration) informed the State that there is a potential disallowance of federal financial participation of \$112 million related to the fiscal year 1993 Nursing Home On June 15, 2000, CMS provided Assessment. a draft audit report that indicated that the State owes \$89.6 million and gave the State until July 14, 2000 to respond. The State's Department of Public Aid responded on July 14, 2000, challenging CMS's draft report. On December 19, 2000, CMS issued its final report, which recommended that the State repay \$89.6 million within 30 days. The final report further stated that if repayment was not made within 30 days, a formal disallowance would be issued. January 19, 2001, a formal disallowance was issued.

The Department filed an appeal of the disallowance before the U.S. Department of Health and Human Services Department Grant Appeals Board on February 16, 2001. While the appeal is pending, repayment need not be made,

although interest will accrue on any portion that the State may have to repay. Requests for a stay have been filed by both the Department and CMS in order for the State to pursue a settlement. Any settlement repayments of or offsets to the federal financing participation would not likely occur until fiscal year 2004 at the earliest.

(D) Federal Funding

The State receives federal grants which are subject to review and audit by federal grantor agencies. Certain costs could be questioned as not being an eligible expenditure under the terms of the grants. At June 30, 2002, other than those identified in note 19(C) above, there were no material questioned costs that have not been resolved with the federal awarding agencies. However, questioned costs could still be identified during audits to be conducted in the future. Management of the State believes there will be no material adjustments to the federal grants and, accordingly, has not recorded a provision for possible repayment.

(E) Tobacco Settlement

A Master Settlement Agreement (MSA) was executed in November of 1998 between five tobacco companies and 46 states, including the State of Illinois. The MSA called for, among other things, the payment of more than \$200 billion allocated to the states in installments payable until the year 2025 with additional payments continuing thereafter in perpetuity. The Illinois share is expected to be \$9.1 billion through 2025. The payments are subject to various adjustments such as those for volume shipped, inflation, and the success of litigation by other governmental units and could amount to less than the expected amounts. Various aspects of the MSA have been challenged in court both locally and nationally (See Footnote 20). Because of the novelty of the MSA and of the many related claims and because of the uncertainty inherent in calculation under the MSA, it is not possible to accurately predict the amount of money that will actually be received by the State with reasonable certainty. The State received \$350, \$268 and \$312 million in fiscal

years 2000, 2001 and 2002, respectively, and \$100 million through April 15, 2003, in fiscal year 2003 in proceeds from the MSA.

(F) Other Legal Proceedings

The State, its units and employees are party to numerous legal proceedings, many of which normally recur, in governmental operations. In addition, the State and its units are involved in certain other legal proceedings, which, if decided adversely to the State, may require the State to make material future expenditures for expanded services or capital facilities or may impair future revenue sources. It is neither possible to determine the outcome of these proceedings nor to estimate the possible effects adverse decisions may have on future expenditures or revenue sources.

(G) Illinois Housing Development Authority Bonds (IHDA)

The IHDA, a component unit of the State, has a portion of its general obligation bonds that are moral obligations of the State. In the event that the IHDA determines that funds will not be sufficient for the payment of principal and interest on these bonds, the Chairman of the IHDA shall certify to the Governor as soon as practicable the amount required by the IHDA to enable it to pay such principal and interest. The Governor shall include the amount so certified in the State budget; however, the General Assembly has no obligation to appropriate funds to IHDA. As of June 30, 2002, the outstanding balance of bonds, which the State is morally obligated to repay is \$327.7 million.

(H) Metropolitan Pier and Exposition Authority (McCormick Place)

The Authority is authorized by the Metropolitan Pier and Exposition Authority Act to issue bonds in the principal amount of \$312.5 million, excluding refunding bonds issued after January 1, 1986. These bonds were issued (1) to pay construction costs of completing the McCormick Place expansion, (2) to pay the construction costs of projects authorized by the Illinois General

Assembly in the future, (3) to refund any outstanding bonds of the McCormick Place that were issued prior to July 1, 1984 and (4) to provide for the acquisition and improvement of Navy Pier in Chicago. In order to provide funding for the debt service requirements on these bonds, the Illinois General Assembly amended tax laws to provide for 1.75% of total State sales tax revenues, 3% of 94% of total hotel room rental receipts, and \$1.7 million per year out of 7% of State racing tax revenues to be deposited into the Build Illinois Fund. Within the Build Illinois Fund are credits to separate accounts, of which one is the "McCormick Place Account" and has first priority credit of the amounts collected.

The bonds are special obligations of the Authority and are payable from and secured by a pledge of revenues derived from dedicated state taxes, discussed above, imposed and collected by the State of Illinois. For State fiscal years in which these bonds are outstanding, the State shall transfer from the McCormick Place Account in the Build Illinois Fund to the Metropolitan Fair and Exposition Authority Improvement Bond Fund an amount equal to 150% of the Authority's certified amount for that fiscal year divided by the number of months during that fiscal year in which bonds of the Authority are outstanding. The maximum amount in any fiscal year shall not exceed \$33.5 million or a lesser sum as is actually necessary and required to pay the debt service requirements for that fiscal year after giving effect to net operating revenues of the Authority available for that purpose as certified by Authority. During fiscal year 2002, debt service requirements were \$31.6 million. However, the amount paid to the Authority based on their annual certification was \$30.3 million, which is below the authorized amount of \$33.5 million.

The Authority is also authorized to issue an additional \$2,107 million of bonds (excluding refunding bonds) which were used to finance the McCormick Place expansion and certain other improvements to its facilities and Navy Pier. These bonds are special, limited obligations of the Authority and are payable from and secured

by a pledge of revenues derived from Authority taxes and State sales tax deposits. For State fiscal years when these bonds are outstanding, monthly deposits of Authority taxes to the McCormick Place Expansion Project Fund are required to be made in an amount equal to 1/8 of the annual debt service as specified in the Authority's Annual Certification plus any prior months' deficiencies in transfers. To the extent that Authority taxes are not sufficient to satisfy the requirements of the Authority's Certification, State sales taxes are deposited into the McCormick Place Expansion Fund. The maximum amount that can be deposited into the McCormick Place Expansion Project Fund from the State sales taxes shall not exceed \$93 million in fiscal year 2002, \$99 million in fiscal year 2003, \$103 million in fiscal year 2004, \$108 million in fiscal year 2005, \$113 million in fiscal year 2006 and graduating to \$275 million in fiscal year 2023 until fiscal year 2042. During fiscal year 2002, debt service requirements for these bonds were \$84 million. The amount paid to the Authority based on their annual certification was \$83.8 million. During fiscal year 2002, only deposits from the Authority's taxes were used to pay to the Authority for the debt service requirements, the State sales tax was not required.

(I) Regional Transportation Authority (RTA)

The RTA was authorized by the Regional Transportation Authority Act to issue bonds in the principal amount of \$100 million on or after January 1, 1990 and increasing \$100 million per year until January 1, 1994, for a total authorization of \$500 million used for Strategic Capital Improvement Projects (SCIP). Effective July 1, 1999, Public Act 91-37 authorized the RTA to issue additional bonds in the principal amount of \$260 million on or after January 1, 2000 and increasing \$260 million per year until January 1, 2004 for an additional authorization of \$1,300 million to be used for SCIP. Public Act 91-37 also authorized the issuance of refunding SCIP bonds. The proceeds of SCIP bonds were used to acquire, repair or replace public transportation facilities in the metropolitan region as approved by the Governor.

The bonds are general obligations of the RTA to which the full faith and credit of the RTA is pledged. However, for State fiscal years in which the SCIP bonds are outstanding, the State's assistance shall be transferred monthly from the Revenue Fund to Transportation Fund for payment in amount equal to the lesser of monthly debt service on the SCIP bonds, or one-twelfth of the amount of the State's assistance as provided in the authorization. The authorization currently provides for \$55 million each year with an additional \$35 million in fiscal year 2002, \$54 million in fiscal year 2003, \$73 million in fiscal year 2004, \$93 million in fiscal year 2005, and \$100 million each fiscal year thereafter. During fiscal year 2002, the State provided \$43.4 million to the RTA, which is below the authorized amount of \$90 million. Although the amount of the State's assistance is measured by the debt service on the SCIP bonds, the assistance is not pledged for payment of, or security for, the SCIP bonds. The State's assistance is paid directly to the Authority and may be spent by the Authority at its discretion.

(J) Illinois Sports Facilities Authority (Authority)

The Authority was authorized by the Illinois Sports Facilities Act to issue bonds and notes in the principal amount not to exceed 1) \$150 million in connection with facilities owned by the Authority, 2) \$399 million in connection with facilities owned by a governmental owner other than the Authority and 3) to refund, advance refund or refinance any of its bonds then outstanding.

The bonds are secured by payments from the Illinois Sports Facilities Fund from collections of 1) the State's Hotel Operator's Occupation Tax in an amount equal to the applicable advance amount plus \$5 million and 2) the City of Chicago's share of the Local Government Distributive Fund in the amount of \$5 million. This advance amount is required to be repaid by the Authority from collections of the Authority's Hotel Tax to the State's General Fund by the end of the fiscal year. In the event of a deficiency in the Hotel Tax, amounts otherwise payable to the

City of Chicago from the Local Government Distributive Fund should be used for the repayment.

Annually, the Authority is required to certify to the State Comptroller and the State Treasurer their requirements for the next fiscal year. This certification shall be the lesser of a) the advance amount plus \$10 million and 2) the amount to pay principal and interest and other payments relating to its obligations issued or to be issued during the fiscal year plus the amount anticipated to pay obligations under provisions of any management agreement with respect to facilities owned by the Authority or any assistance agreement with respect to any facility for which financial assistance is provided under the Act plus an amount to pay other capital or operating expenses of the Authority. Under this formula, the maximum advance amount for fiscal year 2002 was \$22.179 million plus \$10 million for a total of \$32.179 million. The Authority's annual certification for fiscal year 2002 was in the amount of \$25.712 million, which is below the maximum amount authorized. Payments related to the annual certification, which are subject to appropriation by the General Assembly, were paid to the Authority. The Authority repaid the advance amount by the end of the fiscal year and used excess funds to repay the \$5 million received from the State's Hotel Operator's Occupation Tax.

In future years, the advance amount increases by 105.615% of the preceding advance amount through fiscal year 2032. Including the additional \$10 million, the maximum which could be certified each year is \$33.425 million in fiscal year 2003, \$34.741 million in fiscal year 2004, \$36.131 million in fiscal year 2005, \$37.599 million in fiscal year 2006 and graduating to \$124.252 million in fiscal year 2032. Of these amounts, only \$5 million per year is the State's share.

(K) Southwestern Illinois Development Authority (SWIDA) Revenue Bonds

The SWIDA, which is a component unit of the State, has issued revenue bonds. The proceeds of

these bonds were loaned to several companies for the acquisition of land and construction of various types of facilities. These companies are primarily liable for repayment of the bonds, which are secured by SWIDA loan agreements with the companies. These bonds bear interest at rates ranging from 3.9% to 9.25% and mature annually through 2021. The State has accepted a moral obligation to repay the bonds in the event the SWIDA and the companies are unable to meet the bonds' repayment commitments.

As of June 30, 2002 the outstanding balance of bonds, which the State is morally obligated to repay, is \$73.7 million.

(L) Quad Cities Regional Economic Development Authority (Authority) Revenue Bonds

The Authority, which is a component unit of the State, has issued revenue bonds. The proceeds of which were loaned to various companies to provide permanent financing for the acquisition and construction of various types of facilities. These companies are primarily liable for repayment of the bonds, which are secured by (i) mortgages and security agreements (ii) a leasehold mortgage and security agreement, (iii) an assignment of leases, rents and revenue and/or (iv) a guaranty, to the trustee. The bonds mature semiannually through 2017 and bear interest at rates of 8.7% and 9.75%. The State has accepted a moral obligation to repay the bonds in the event the Authority and the companies are unable to meet the bonds' repayment commitments.

At June 30, 2002, the outstanding balance which the State is morally obligated to repay, is \$13.4 million. This amount is based on maturity

schedules of the outstanding bonds since a confirmation had not been received from the Authority by the State as of the report date.

(M) Upper Illinois River Valley Development Authority (UIRVDA) Revenue Bonds

The UIRVDA, which is a component unit of the State, has issued revenue bonds. The proceeds from these bonds were loaned to a company to finance the acquisition, construction, equipment and installation of a tire recycling and tire-derived fuel processing facility and to refund in advance of their maturity certain bonds.

The company is primarily liable for repayment of the bonds, which are secured by an assignment and a pledge of revenues derived from a separate loan agreement between the UIRVDA and the company. These bonds mature annually through 2014 and bear interest at a rate of 5.9%. The State has accepted a moral obligation to repay the bonds in the event the UIRVDA and the company are unable to meet the bonds' repayment commitments.

At June 30, 2002, the outstanding balance which the State is morally obligated to repay, is \$2.4 million. This amount is based on maturity schedules of the outstanding bonds since a confirmation had not been received from the Authority by the State as of the report date.

(N) Illinois Housing Development Authority Loans

The Illinois Housing Development Authority has entered into commitments aggregating \$72.7 million for the purchase of various home loans as of June 30, 2002.

SUBSEQUENT EVENTS

Unemployment Compensation Trust Fund:

On February 4, 2003, the Governor of the State of Illinois applied for repayable advances to the Unemployment Compensation Trust Fund from the Federal government for the months of February, March and April 2003 in order to pay benefits to claimants as required by law. The Unemployment Compensation Trust Fund was expected to be depleted as of late February or early March 2003, due to extended high unemployment rates during the course of the current recession and tax revenues that have not matched the increased level of unemployment benefit payments. When federal borrowing occurs on or after January 1 of any given year, it must be repaid by September 30 in order to be interest free. If applicable, interest will be assessed during calendar year 2003 at an annual rate of 6.0757% and cannot be paid from the Unemployment Compensation Trust fund.

The Governor's request was approved for an initial borrowing of \$450 million through April 2003, which will be paid off in the first two weeks of May 2003, when the first quarter employer tax contributions are received. It is projected that borrowing will resume in June and continue through the end of the calendar year 2003. The Department projects that there will be a deficit in the Unemployment Compensation Trust Fund through at least 2005, absent a robust economic recovery and/or legislative changes to the system.

Early Retirement Incentive:

On June 25, 2002, the Governor signed P.A. 92-566 that amended the Illinois Pension Code and created the Early Retirement Incentive (ERI). The ERI allowed members of the State Employees' Retirement System to purchase up to

five years of service and age enhancement and then leave State employment by January 1, 2003. Employees who took the ERI who subsequently return to service in any permanent position under the State Employees' Retirement System will forfeit the ERI age and service enhancements received and will receive a refund of contributions made under the ERI. As directors of State agencies were allowed to keep key retirees on payroll for seventy-five days after January 1, 2003, the effect of the liquidation on accrued compensated absences is not determinable at this time.

Moral Obligation Bonds:

Southwestern Illinois Development Authority (SWIDA), a discreetly presented component unit of the State of Illinois, has been notified, subsequent to June 30, 2002, by UMB Bank (Trustee) that Spectrulite Consortium, Inc. (Obligor) recipient of the Series 1995 Industrial Development Revenue Bonds (Bonds) has petitioned the United States Bankruptcy Court for reorganization under Chapter 11 of Title 11 of the United States Bankruptcy Code. Heretowith, there has been sufficient reserves in the Special Reserve Fund and the Debt Service Reserve Fund that were created pursuant to the Series 1995 Bond Indenture. However, there are not sufficient reserves in these two funds for the debt service payments scheduled for fiscal year 2004.

On February 4, 2003, the Trustee requested the Chairman of SWIDA to certify in writing to the Governor the amount required by the SWIDA to enable it to pay the principal and interest due on the Bonds during fiscal year 2004. Pursuant to the provisions of the bond indenture, this request must be made for sufficient appropriations to be passed for the repayment of the principal and interest due.

General Obligation, Special Obligation and Revenue Bonds and Notes:

Subsequent to June 30, 2002, the following general obligation, special obligation and revenue bonds, notes and certificates of participation have been issued:

Series	Date of Issue		mount Issue	Interest Rates	Annual Maturity To
Primary Government:			ISSUE	Kates	- Maturity 10

On April 10, 2003, the Governor signed Public Act 93-2 into law that establishes the Pension Contribution Fund and authorizes the issuance of up to \$10 billion of general obligation bonds. The proceeds of this issuance are to be deposited into the Pension Contribution Fund. The Pension Contribution Fund will transfer \$.3 billion which represents the required State contributions to the designated retirement systems for the last quarter of State fiscal year 2003, plus \$1.86 billion representing the required State contributions to the designated retirement systems for State fiscal year 2004. The designated retirement systems for purposes of this legislation means the State Employees' Retirement System of the State of Illinois; the Teachers' Retirement System of the State of Illinois; the State Universities Retirement System; the Judges Retirement System of Illinois; and the General Assembly Retirement System.

Revenue Anticipation Certificates:

Subsequent to June 30, 2002, the State issued \$1 billion in short-term Revenue Anticipation Certificates. These certificates were issued under the provisions of the Short-Term Borrowing Act.

The certificates were issued on July 23, 2002 and mature in varying amounts in January, 2003, April, 2003, May, 2003 and June, 2003. Interest rates on these certificates range from 2.25% to 3.00%.

Tobacco Settlement:

Subsequent to June 30, 2002, the State settled a dispute with its contracted attorneys over legal fees to be paid in conjunction with the suit against tobacco manufacturers and the resulting execution of the Master Settlement Agreement (MSA). The State's contract with its contracted attorneys called for the contracted attorneys to

receive fees in the amount of 10 percent of the State's recovery (estimated to be \$9.1 billion). However, the MSA provided for arbitration to determine the appropriate fees that would be paid out of funds provided by the defendant over and above the states' proceeds. The arbitrator awarded only \$121 million in fees to the State's contracted attorneys causing the State's contracted attorneys to file an attorney's lien against the State's proceeds to recover the difference of \$789 million. The State has agreed to settle the matter by paying \$22.5 million of the State's MSA proceeds in each of the next three fiscal years to the contracted attorneys for a total settlement of \$67.5 million.

On March 21, 2003, private plaintiffs obtained a \$10.1 billion judgment against Philip Morris USA Inc. in a case brought in Madison County for deceiving Illinois smokers into believing light cigarettes were safer than regular cigarettes. Included in the \$10.1 billion was an award of punitive damages in the amount of \$3 billion that the judge ordered to be paid to the State. On April 4, 2003, Philip Morris USA, Inc. obtained a temporary restraining order in the State case from a judge in Cook County preventing the State from collecting the punitive damages awarded in the Madison County case. In addition, on April 15, 2003, Philip Morris USA Inc. made payment on a \$6 billion appeal bond in order to appeal the decision made in Madison County.

Pension Trust Fund Investments:

Investment assets of the State's pension trust funds had declines subsequent to year-end. Additional information on subsequent events for State sponsored retirement systems may be found in their publicly available financial reports. (See Footnote 15)

Notes to Budgetary Comparison Schedule – Budget and Actual – Major Governmental Funds

For the Year Ended June 30, 2002

A. Budgetary Basis of Accounting

The State Constitution requires the Governor to prepare and submit to the General Assembly an Executive Budget for the ensuing fiscal year. The budget covers most funds held by the State, but excludes all locally held funds and various treasury held funds which are not subject to appropriation pursuant to State law. The General Assembly enacts the budget through passage of specific line-item appropriations (i.e., personal services, contractual services, equipment, etc.), the sum of which must not exceed estimated revenues pursuant to the State Constitution. The Governor has the power to approve, reduce or veto each appropriation passed by the General Assembly. Transfers-in and transfers-out contained in the Executive Budget are not a part of the General Assembly's appropriation process. The actual amounts are determined either by State law or by discretionary action available to the Governor. The Statewide Accounting Management System controls expenditures by line item as established in approved appropriation bills and ensures that appropriated expenditure amounts are not exceeded.

The level of legal control is at the line-item appropriation level as reported in a publication titled *Illinois Detailed Annual Report of Revenues and Expenditures* (i.e., Office of the Comptroller, Department of Human Services, Department of Corrections, etc). A separate document is necessary due to the States' large amount of appropriated line-items. Administrative transfers between certain appropriation line items within the same treasury held fund cannot exceed 2% of the aggregate amount appropriated to an agency from that fund. Examples of appropriation line items with a 2% transfer limit are Contractual Services, Travel, Commodities, Printing and Equipment. Legislative action is required for more substantial transfers. Unexpended appropriations at June 30 are available for subsequent expenditure to the extent that encumbrances have been incurred at June 30, provided they are presented for payment during the succeeding 2-month "lapse period." Certain appropriations referred to as "reappropriations" represent the continuation of a prior year's program that requires additional time for completion.

The original budgeted revenues represent estimates while original budgeted expenditures represent original and continuing appropriations enacted into law by appropriation bills. Generally accepted accounting principles (GAAP) requires that the final legal budget be reflected in the final budget column, therefore, updated revenue estimates have been reported. Final expenditure budgets represent original and continuing appropriations modified by supplemental and amendatory appropriations. The State's basis of budgeting is essentially on the cash basis, modified for expenditures during the lapse period (beginning and end of year) as described in the preceding paragraph.

The Budgetary Comparison Schedule – Major Governmental Funds presents the original legally adopted budget, as well as comparisons of the final legally adopted budget with actual data on a budgetary basis for the State's major governmental funds: the General Fund, the Road Fund, the Motor Fuel Tax Fund and the School Construction Account.

The supplementary portion of this report includes a Combining Schedule of Revenues, Expenditures, and Changes in Fund Balance – Budget and Actual for all funds of the State with annual budgets as classified for budgetary purposes. Those schedules only include the final appropriated budget.

B. Budgetary-GAAP Reporting Reconciliation

Since accounting principles applied for purposes of developing data on a budgetary basis differ significantly from those used to present financial statements in conformity with GAAP, a reconciliation of differences between budgetary and GAAP presentations for the year ended June 30, 2002 is presented below for the major governmental funds (amounts expressed in thousands):

Table 1-1 (amounts expressed in thousands)		ı	MAJOR GOVERN	MEI	NTAL FUNDS	
		General Fund		Road Fund		Motor Fuel Tax Fund	State Construction Account
Excess (deficiency) of revenues over (under) expenditures and other sources (uses) of financial resources (budgetary basis)	\$	(1,385,605)	\$	80	\$	2,835	\$ (110,603)
Adjustments: To adjust revenues, related receivables and deferred revenue		(1,581,011)		(17,729)		5,006	(23,646)
To adjust expenditures and related liabilities		1,077,848		(47,829)		(12,507)	(10,038)
To adjust for lapse period expenditures which were not recorded as liabilities		(43,206)		(3,016)		(35)	-
Excess (deficiency) or revenues over (under) expenditures/expenses and other sources (uses) of financial resources into financial resources (GAAP basis) - budgetary classifications		(1,931,974)		(68,494)		(4,701)	(144,287)
To record excess (deficiency) of revenues over (under) expenditures/expenses and other sources (uses) of financial resources for nonbudgeted accounts		(9,150)					
Excess (deficiency) of revenues over (under) expenditures and other sources (uses) of financial resources (GAAP basis)	\$	(1,941,124)	\$	(68,494)	\$	(4,701)	\$ (144,287)

Required Supplementary Information Pension Trust Funds – Schedule of Funding Progress (Unaudited)

GENERAL FUND

The General Fund is maintained to account for resources obtained and used for those services traditionally provided by State government which are not required to be accounted for in another fund.

SIGNIFICANT GENERAL FUND ACCOUNT DESCRIPTIONS

<u>General Revenue Account</u>-to account for resources obtained and used which are not required to be accounted for in another fund or account.

<u>Education Assistance Account</u>--to provide funding for elementary and secondary education programs and for higher education programs.

<u>Common School Account</u>--to provide funding for elementary and secondary education agencies including General State Aid, School District Consolidation Incentives and operational funding of Educational Services Regions.

<u>University of Illinois Hospital Services Account</u>--to provide medical services at the University of Illinois Hospital.

County Hospital Services Account--to provide for medical services at Cook County hospitals.

<u>Long-Term Care Provider Account</u>--to provide for medical services at long-term health care centers.

SPECIAL REVENUE FUNDS

The Special Revenue Funds are maintained to account for the proceeds of specific revenue sources that are legally restricted to expenditures for specified purposes.

SIGNIFICANT NON-MAJOR GOVERNMENTAL SPECIAL REVENUE FUNDS DESCRIPTIONS

Secretary of State

<u>Securities Audit and Enforcement Fund</u>--to provide for the on-site examination of Security Dealers, investment advisors, and issuers.

Treasurer

<u>Tobacco Settlement Recovery Fund</u>--to account for monies received from the Master Settlement Agreement in State of Illinois vs. Philip Morris and any future payments from tobacco production companies.

Department of Commerce and Community Affairs

<u>Supplemental Low Income Energy Assistance Fund</u>--to provide assistance to low-income households in paying heating and cooling costs.

<u>Fund for Illinois' Future</u>--to account for grants and expenditures for planning, engineering, acquisition, construction, reconstruction, development, improvement and extension of public infrastructure in the State of Illinois.

<u>Low Income Home Energy Assistance Block Grant Fund</u>--to provide assistance to low-income households in paying heating and cooling costs.

<u>Build Illinois Capital Revolving Loan Fund</u> --to finance intermediary agreements, administration, technical assistance agreements, loans, grants, and investments through the Build Illinois Act.

<u>Public Infrastructure Construction Loan Revolving Fund</u> --to provide loans and grants to local governments to assist in financing the cost of acquisition, construction, reconstruction, replacement, repair, or improvement of public infrastructure.

Department of Human Services

<u>Vocational Rehabilitation Fund</u> --to account for federal monies or grants from private or public sources for vocational rehabilitation.

<u>DHS Special Purposes Trust Fund</u> --to receive and disburse federal grants, gifts or legacies not elsewhere designated by statute to be deposited and disbursed.

<u>Early Intervention Services Revolving Fund</u> --to provide coordinated, comprehensive, interdisciplinary services to enforce the growth and development of children from birth through 36 months of age who have disabilities and/or developmental delays.

<u>U.S.D.A.</u> Women, Infants and Children Fund --to provide for the administration of the federal special Supplemental Food Program for Women, Infants, and Children.

<u>Community Mental Health Medical Fund</u> --to reimburse community mental health service providers for Medicaid reimbursed mental health services.

<u>Food Stamp and Commodity Fund</u> --to account for food stamps and commodities received from the federal government.

Department of Public Aid

<u>Special Education Medicaid Matching Fund</u> --to record monies received from the federal government for educationally related services authorized under Section 1903 of the Social Security Act. Monies in the Fund are to be distributed to school districts by the State Board of Education for Medicaid eligible special education children claims.

<u>Child Support Enforcement Trust Fund</u> --to record child support payments, federal grants, and incentive payments that are related to the Child Support Enforcement Program.

Department of Revenue

<u>State Gaming Fund</u> --to receive and record fees obtained from owners' license applications for riverboat gambling operations.

State and Local Sales Tax Reform Fund -to record proceeds from the 1% use tax on food and drugs and 20% of the proceeds from the 6.25% sales tax.

<u>County and Mass Transit District Fund</u> --to record 4% of the proceeds from a 6.25% Retailers' and Service Occupation tax.

<u>Local Government TaxFund</u> --to account for 15% share of various sales taxes that will be distributed to cities and counties.

<u>Local Government Distributive Fund</u> --a portion of State income tax collections that are distributed to the various municipalities and counties within the State. On a monthly basis, 1/12 of the income tax receipts are transferred to this fund from the General Fund for such distributions.

<u>Personal Property Tax Replacement Fund</u> --the net revenue received from the personal property replacement income tax. Expenditures consist of allocations to each taxing district within the State and administrative costs.

<u>Build Illinois Fund</u> --to receive a percentage of sales, hotel and privilege taxes to be used for monthly allocation to various state agencies for the purpose of promoting tourism related activities.

Department of Transportation

<u>Grade Crossing Protection Fund</u> --to pay the State's portion of the cost of installing protection devices at all places where public highways intersect with a railroad.

Federal/Local Airport Fund --to receive and manage federal funds for airport construction.

<u>State Rail Freight Loan Repayment Fund</u> --to receive and record repayments of loans of State funds made by the Illinois Department of Transportation to any railroad, unit of local government, rail user or owner or lessee of railroad right of way to rehabilitate, improve or construct rail facilities.

<u>Public Transportation Fund</u> --to receive and record monthly transfers from the General Revenue Fund representing statutory shares under various sales tax acts. Monies in the Fund are then distributed to the Regional Transportation Authority pursuant to a statutory formula.

<u>Downstate Public Transportation Fund</u> --to provide financial assistance for local governments with public transportation systems.

Department of Children and Family Services

<u>Children's Services Fund</u> --to account for revenues and expenditures related to the federal Title IV-E foster care and adoption service program.

Department of Natural Resources

Open Space Lands Acquisition and Development Fund --to receive deposits from monies collected under the Real Estate Transfer Tax Act to be transferred, appropriated, and used only for the purposes authorized by the Open Space Lands Acquisition and Development Act.

Department of Corrections

Reimbursement Fund --to account for grants received by the Department of Corrections.

Department of Employment Security

<u>Title III Social Security and Employment Services Fund</u> --to account for monies received from the federal government for the specific purpose of administering the Unemployment Compensation Act.

Department of Financial Institutions

<u>State Pensions Fund</u> --receipts from the sale of abandoned property. Expenditures are primarily to the various State retirement systems for the reduction of the accrued actuarial unfunded liability.

Environmental Protection Agency

<u>Hazardous Waste Fund</u> --to receive fees collected from the owner or operator of each hazardous waste disposal site, from responsible parties for hazardous waste cleanups and for penalties assessed by the Pollution Control Board or circuit courts in cases related to hazardous waste cleanups.

<u>Vehicle Inspection Fund</u> --to provide for the testing and inspection of motor vehicles.

State Board of Education

<u>Drivers Education Fund</u> --to account for monies used to reimburse school districts for each pupil completing a driver education course that meets the minimum requirements of the Driver Education Act.

<u>Federal Department of Agriculture Fund</u> --to account for the federal share of nutrition programs which provide nutritious meals for children and aging adults.

<u>Federal Department of Education Fund</u> --to receive and disburse federal monies to provide financial assistance for educational programs funded by the U.S. Department of Education.

<u>School Technology Revolving Loan Program Fund</u> --to receive and record all monies obtained from transfers from the School Infrastructure Fund, to be expended for the purpose of making school technology hardware improvements affordable.

Capital Development Board

<u>School Infrastructure Fund</u> --to receive and record one-half of monies obtained from a telecommunication tax in accordance with the Telecommunications Excise Tax Act as amended. Monies in the Fund may be expended for the purpose of discharging the principal and interest on bond indebtedness for construction of school improvements, making payments to the School Technology Revolving Loan Fund and grants for school construction projects.

Criminal Justice Information Authority

<u>Juvenile Accountability Incentive Block Grant Fund</u> --to account for federal receipts used to provide financial support to State agencies and units of local government and to pay administrative costs associated with the juvenile accountability incentive block grant program.

Metropolitan Pier and Exposition Authority

<u>McCormick Place Expansion Project Fund</u> --to receive and record monies obtained from transfers from the Metropolitan Pier and Exposition Authority Trust Fund and the sales tax deposits.

State Fire Marshal

<u>Underground Storage Tank Fund</u> --to record underground storage tank registration fees collected by the State Fire Marshal, expended for the purposes of the Leaking Underground Storage Tank program.

Student Assistance Commission

<u>Federal Student Loan Fund</u> --to account for the Federal Family Education Loan Program that funds the repayment of guaranteed loans that have gone into default to lenders.

<u>Federal Reserve Recall Fund</u> --to account for the transfer of reserve recall from the Federal Student Loan Fund per the Balanced Budget Act of 1997.

DEBT SERVICE FUNDS

The Debt Service Funds are maintained to account for resources obtained and accumulated to pay interest and principal on general long-term obligations.

SIGNIFICANT NON-MAJOR GOVERNMENTAL DEBT SERVICE FUNDS DESCRIPTIONS

Treasurer

General Obligation Bond Retirement and Interest Fund—to account for payments of principal and interest related to general obligation bonds. These bonds provide financing for the protection of the environment within the State; the acquisition, construction, reconstruction, extension, and improvement of highways; the acquisition, construction, reconstruction, and improvement of capital projects; the construction of facilities leased back to the State; and the development of mass transportation and aviation systems within the State.

Department of Central Management Services

<u>ESCO COP Debt Service Fund</u> --to account for payments of principal and interest related to ESCO Certificates of Participation. Funding consists of transfers from funds which use the facilities purchased with the ESCO Certificates of Participation proceeds and investment income.

Department of Commerce and Community Affairs

<u>Illinois Civic Center Bond Retirement and Interest Fund</u> --to account for the payment of principal and interest upon bonds issued to finance the construction of local civic centers. Funding consists of transfers from the Metropolitan Exposition Auditorium and Office Building Fund and investment income.

Bureau of the Budget

<u>Build Illinois Bond Retirement and Interest Fund</u> --to account for the payment of principal and interest upon bonds issued to finance improvements related to existing or planned scientific research, manufacturing or industrial development or expansion in Illinois. Funding consists of transfers from the Build Illinois Fund and investment income.

Student Assistance Commission

<u>Student Assistance Commission COP Debt Service Fund</u> --to account for payments of principal and interest related to Student Assistance Commission Certificates of Participation. Funding consists of transfers from funds which use the facilities purchased with the Student Assistance Commission Certificates of Participation proceeds and investment income.

CAPITAL PROJECTS FUNDS

The Capital Projects Funds are maintained to account for the acquisition and/or construction of major capital facilities.

SIGNIFICANT NON-MAJOR GOVERNMENTAL CAPITAL PROJECTS FUNDS DESCRIPTIONS

Department of Commerce and Community Affairs

<u>Build Illinois Bond Fund</u> --to account for the proceeds of bond sales from the Build Illinois Bond Program. The proceeds are used to finance improvements related to scientific research, manufacturing, and industrial development or expansion.

Department of Natural Resources

<u>Conservation 2000 Projects Fund</u>--to account for proceeds from bond issues and disbursements for natural resources programs.

Department of Transportation

<u>Transportation Bond Series A Fund</u> --to account for proceeds of bond issues to finance State highway acquisition, construction, reconstruction, extension and improvements.

<u>Transportation Bond Series B Fund</u> --to provide funds through the sale of bond issues for mass transportation and aviation purposes including, but not limited to, the acquisition of mass transportation equipment, including rail and bus, and other equipment for counties under the Regional Transportation Authority.

Capital Development Board

<u>Capital Development Fund</u> --to account for proceeds from bond issues and disbursements for capital development projects within the State.

<u>School Construction Fund</u> --to account for the proceeds from bond issues under school construction building projects.

<u>Capital Development Board Contributory Trust Fund</u> --to account for local, state, and federal funding for the construction and remodeling of buildings, and the purchase of land and equipment in connection with the various contributing educational institutions, State departments and agencies as authorized by law.

ENTERPRISE FUNDS

Enterprise Funds are maintained to account for the operations where the intent of the State is to provide services to the general public in a manner similar to private business enterprises.

SIGNIFICANT NON-MAJOR ENTERPRISE FUNDS DESCRIPTIONS

Department of Central Management Services

<u>Local Government Health Insurance Reserve Fund</u> --to provide health and dental insurance to participating local government entities. Premiums are collected from units of local government and the insurance plan is administered by private companies.

<u>Teacher Health Insurance Security Fund</u> --to provide health benefits for the Teachers' Retirement System recipient and dependent beneficiaries.

Department of Insurance

Office of the Special Deputy Receiver--to account for expenses in connection with the liquidation, conservation and rehabilitation of insurance companies.

Department of Lottery

<u>State Lottery Fund</u> --to account for all receipts and expenses from the operation of the State Lottery. The net proceeds are transferred to the General Fund.

Student Assistance Commission

<u>Prepaid Tuition Fund</u> --to account for the net assets held by the Illinois prepaid tuition program, *College Illinois!*.

INTERNAL SERVICE FUNDS

Internal Service Funds are maintained to account for the operations of State agencies which render service to other State agencies or governmental units on a cost-reimbursement basis.

SIGNIFICANT INTERNAL SERVICE FUNDS DESCRIPTIONS

Central Management Services

<u>State Garage Revolving Fund</u> --to account for the operation and maintenance of State garages including the servicing and repair of all automotive equipment owned or controlled by the State. Revenues consist of charges to user agencies.

<u>Statistical Services Revolving Fund</u> --to account for the purchase, maintenance, and operation of electronic data processing and information devices used by State agencies. Revenues consist of charges from the user agencies.

<u>Communications Revolving Fund</u> --to account for the expenses related to telecommunications services for State agencies. Revenues consist of reimbursements from user agencies.

<u>Health Insurance Reserve Fund</u> --to account for the self-insurance medical and dental plan for State employees and qualified dependents. This fund records all contributions, appropriations, interest, dividends, and expenses related to the plan.

Department of Corrections

Working Capital Revolving Fund --to account for the income and expenses associated with the industrial operations at the several State institutions.

SIGNIFICANT INVESTMENT TRUST FUNDS DESCRIPTIONS

Treasurer

<u>Public Treasurers' External Investment Pool Fund</u>--to hold and invest public funds deposited by local Treasurers to enhance investment opportunities - in effect a mutual fund.

<u>College Savings Pool Fund</u>--to account for assets held by the Bright Start College Savings Program, a qualified State tuition program under Section 529 of the Internal Revenue Code. The program provides an opportunity for investors to invest on a tax-favored basis toward the qualified higher education expenses of a designated beneficiary associated with attending an institution of higher education.

Department of Lottery

<u>Deferred Prize Winners Trust Fund</u>--to hold the proceeds of investments that will be paid to Illinois State Lottery prize winners. Investment contracts are executed by the State Treasurer with the State Lottery Director's approval in a manner which ensures the timely payment to prize winners.

SIGNIFICANT AGENCY FUNDS DESCRIPTIONS

Treasurer

<u>Protest Fund</u>--to provide a "holding" fund for taxes paid under protest, pending the outcome of litigation.

Department of Insurance

<u>Security Deposit Fund</u>--to hold securities on deposit by domestic and certain foreign domiciled insurance companies in the State for protection of all policyholders, policy obligations and creditors of the companies.

Department of Public Aid

<u>Public Assistance Recoveries Trust Fund</u>--to account for the deposit of recoveries from federally-aided assistance programs.

<u>Child Support Enforcement Trust Fund</u>--to account for that portion of the Child Support Enforcement Trust Fund that hold monies recovered under the Child Support Enforcement Program until they can be paid over to the appropriate third parties.

Department of Revenue

<u>Home Rule Municipal Retailers Occupation Tax Fund</u>--to receive and record monies collected from a tax imposed upon all persons, in such municipality, in the business of selling tangible personal property.

Metro-East Park and Recreation Fund--to account for the 1/10th percent of sales tax imposed by the Metro-East Park and Recreation District effective July 1, 2001, and collected by the Department of Revenue.

RTA Sales Tax Fund--to receive and record deposits of the RTA Sales Tax.

<u>Long-Term Care Fund Clearing Account</u>--to provide a "holding" fund for taxes paid on other tobacco products (i.e. other than cigarettes) required by a court order to be held in a separate temporary escrow fund.

COMPONENT UNITS

Component Units are legally separate organizations for which the elected officials of the primary government are financially accountable. Component Units also include certain other organizations because of the nature and significance of their relationship with the primary government.

NON-MAJOR COMPONENT UNITS DESCRIPTIONS

<u>Illinois Literacy Foundation</u>--to account for supplemental funds raised from the private sector to promote the Illinois Literacy Foundation.

<u>Community Development Finance Corporation</u>—to promote economic redevelopment within designated areas.

<u>Illinois Grain Insurance Corporation</u>--to account for monies held to compensate grain producers for losses from the failure of a grain dealer.

<u>Illinois Conservation Foundation</u>--to provide additional funding for the Illinois Department of Natural Resources' conservation programs that either are not receiving adequate State funding or else cannot be implemented because State funding is not available.

<u>The Comprehensive Health Insurance Plan Board</u>--to provide an alternate market for health insurance for eligible Illinois residents having a preexisting health condition.

<u>East St. Louis Financial Advisory Authority</u>--to provide a secure financial basis for and to furnish assistance to the City of East St. Louis.

<u>Illinois Farm Development Authority</u>--to develop various programs designed to maintain and promote the agricultural economy of the State.

<u>Illinois Health Facilities Authority</u>--to provide alternative methods of financing to not-for-profit and public health care providers.

<u>Illinois Educational Facilities Authority</u>--to provide tax exempt financing for the acquisition or construction of educational facilities.

<u>Illinois Development Finance Authority</u>--to provide funding for industrial, commercial, and manufacturing development in areas of Illinois with critical unemployment.

<u>Illinois Rural Bond Bank</u>--to provide assistance to rural government units by providing adequate capital markets and facilities for borrowing money and financing improvements at low interest rates.

<u>Illinois Medical District Commission</u>—to combine the resources of diverse medical institutions to promote low cost medical care in the City of Chicago, accelerate scientific research, improve diagnostic methods, and train health care professionals.

<u>Quad Cities Regional Economic Development Authority</u>--to provide funding for development in the Quad cities region.

<u>Southwestern Illinois Development Authority</u>--to promote and enhance economic development in St. Clair and Madis on counties in southwestern Illinois.

<u>Upper Illinois River Valley Development Authority</u>—to promote and enhance economic development within the State's Upper Illinois River Valley.

<u>Will-Kankakee Regional Development Authority</u>--to promote and enhance economic development in the counties of Will and Kankakee.

<u>Board of Trustees of Chicago State University</u>--to operate, manage, control, and maintain Chicago State University. The Board was created on January 1, 1996 with the dissolution of the Board of Governors of State Colleges and Universities.

<u>Board of Trustees of Eastern Illinois University</u>--to operate, manage, control, and maintain Eastern Illinois University. The Board was created on January 1, 1996 with the dissolution of the Board of Governors of State Colleges and Universities.

<u>Board of Trustees of Governors State University</u>--to operate, manage, control, and maintain Governors State University. The Board was created on January 1, 1996 with the dissolution of the Board of Governors of State Colleges and Universities.

<u>Board of Trustees of Northeastern Illinois University</u>--to operate, manage, control, and maintain Northeastern Illinois University. The Board was created on January 1, 1996 with the dissolution of the Board of Governors of State Colleges and Universities.

<u>Board of Trustees of Western Illinois University</u>--to operate, manage, control, and maintain Western Illinois University. The Board was created on January 1, 1996 with the dissolution of the Board of Governors of State Colleges and Universities.

Budgetary Schedules

The following budgetary schedules for the State have been prepared in accordance with the terminology and classifications of funds used by the State in the Statewide Accounting Management System ("SAMS") budgetary purposes. SAMS establishes the following budgetary fund groups to account for the State's budgetary activities:

General – funds established to account for those services traditionally provided by a state government which are not required to be accounted for in other funds;

Highway – funds established to receive and distribute assessments related to transportation, and to support the construction and maintenance of transportation facilities and activities of the State;

Special State – funds designated by statute as special funds in the State Treasury and not elsewhere classified:

Bond Financed – funds established to receive and administer the proceeds of various bond issues of the State:

Debt Service – funds established to finance and account for the payment of principal and interest generally associated with the general and special obligation bond issues of the State;

Federal Trust – funds established pursuant to grants and contracts or under statutory authority between State agencies and the federal government;

Revolving – funds established to finance and account for intra-governmental services; and

State Trust – funds established by statute or under statutory authority for nonfederal programs which are not deemed to be a traditional governmental activity or elsewhere classified.

As the attached schedules are presented on the budgetary basis and not the GAAP basis of accounting, all budgeted funds of the State, including those presented as required supplemental information, are presented. The schedules presented as required supplemental information classify certain major governmental funds differently for GAAP reporting purposes than the following budgetary presentation. Below is a summary of those differences:

GAAP Basis	Budgetary Basis Includes
General Fund	All General Funds Special State Funds: Budget Stabilization Fund University of Illinois Hospital Services Fund County Hospital Services Fund Care Provider Fund for Person with Developmental Disabilities Fund Long Term Care Fund Drug Rebate Fund Income Tax Refund Fund and 11 funds included as other special state funds
Motor Fuel Tax Fund	Highway Funds: Motor Fuel Tax Fund - State Motor Fuel Tax Fund - Counties Motor Fuel Tax Fund - Municipalities Motor Fuel Tax Fund - Townships

- (a) The Commission redeemed \$68.27 million of principal with bond proceeds in December 1992.
- (b) The Commission redeemed \$135.86 million of principal with bond proceeds in February 1994.
- (c) The Commission redeemed \$49.695 million of principal with bond proceeds in February 1995.
- (d) The Commission redeemed \$49.9 million of principal with bond proceeds in February 1996.
- (e) The Commission \$68.0 million of principal with bond issuance of \$23.7 million in February 1997 and \$44.3 million in May 1997.
- (f) The Authority redeemed \$58.005 million of principal with bond proceeds throughout the year.
- In addition, the Authority used \$4.241 million from the sale of mortgage loan receivables to redeem previously issued bor
- (g) The Authority redeemed \$146.645 million of principal with bond proceeds throughout the year.
- (h) The Authority redeemed \$57.625 million of principal with the bonds proceeds in November 1994.
- (i) The Authority redeemed \$32.44 million of principal with bond proceeds in November 1995.
- (i) The Commission redeemed \$19.3 million of principal with bond issuance proceeds in February 1998.
 (k) The Commission redeemed \$34.6 million of principal with bond issuance proceeds in February 1999.
- (k) The Commission redeemed \$34.6 million of principal with bond issuance proceeds in February 1999.
 (l) The Commission redeemed \$34.8 million of principal with bond issuance proceeds in February 2000.
- (m) The Authority issued \$148.3 million of revenue bonds in October 1996, to current refund of \$144.3 million of revenue bonds
- (n) The Commission redeemed \$29.5 million of principal with bond issuance proceeds in November 2000.
- (o) The Commission redeemed \$33.6 million of principal with bond issuance proceeds in January 2002.

Revenue Bond Coverage * University

For the Last Ten Fiscal Years (Expressed in Thousands Except Coverage Data)
